Central University of Technology, Free State

How to manage your CUT/eThuto password

The first part of this tutorial shows how to register your password. This action has to be performed only once.

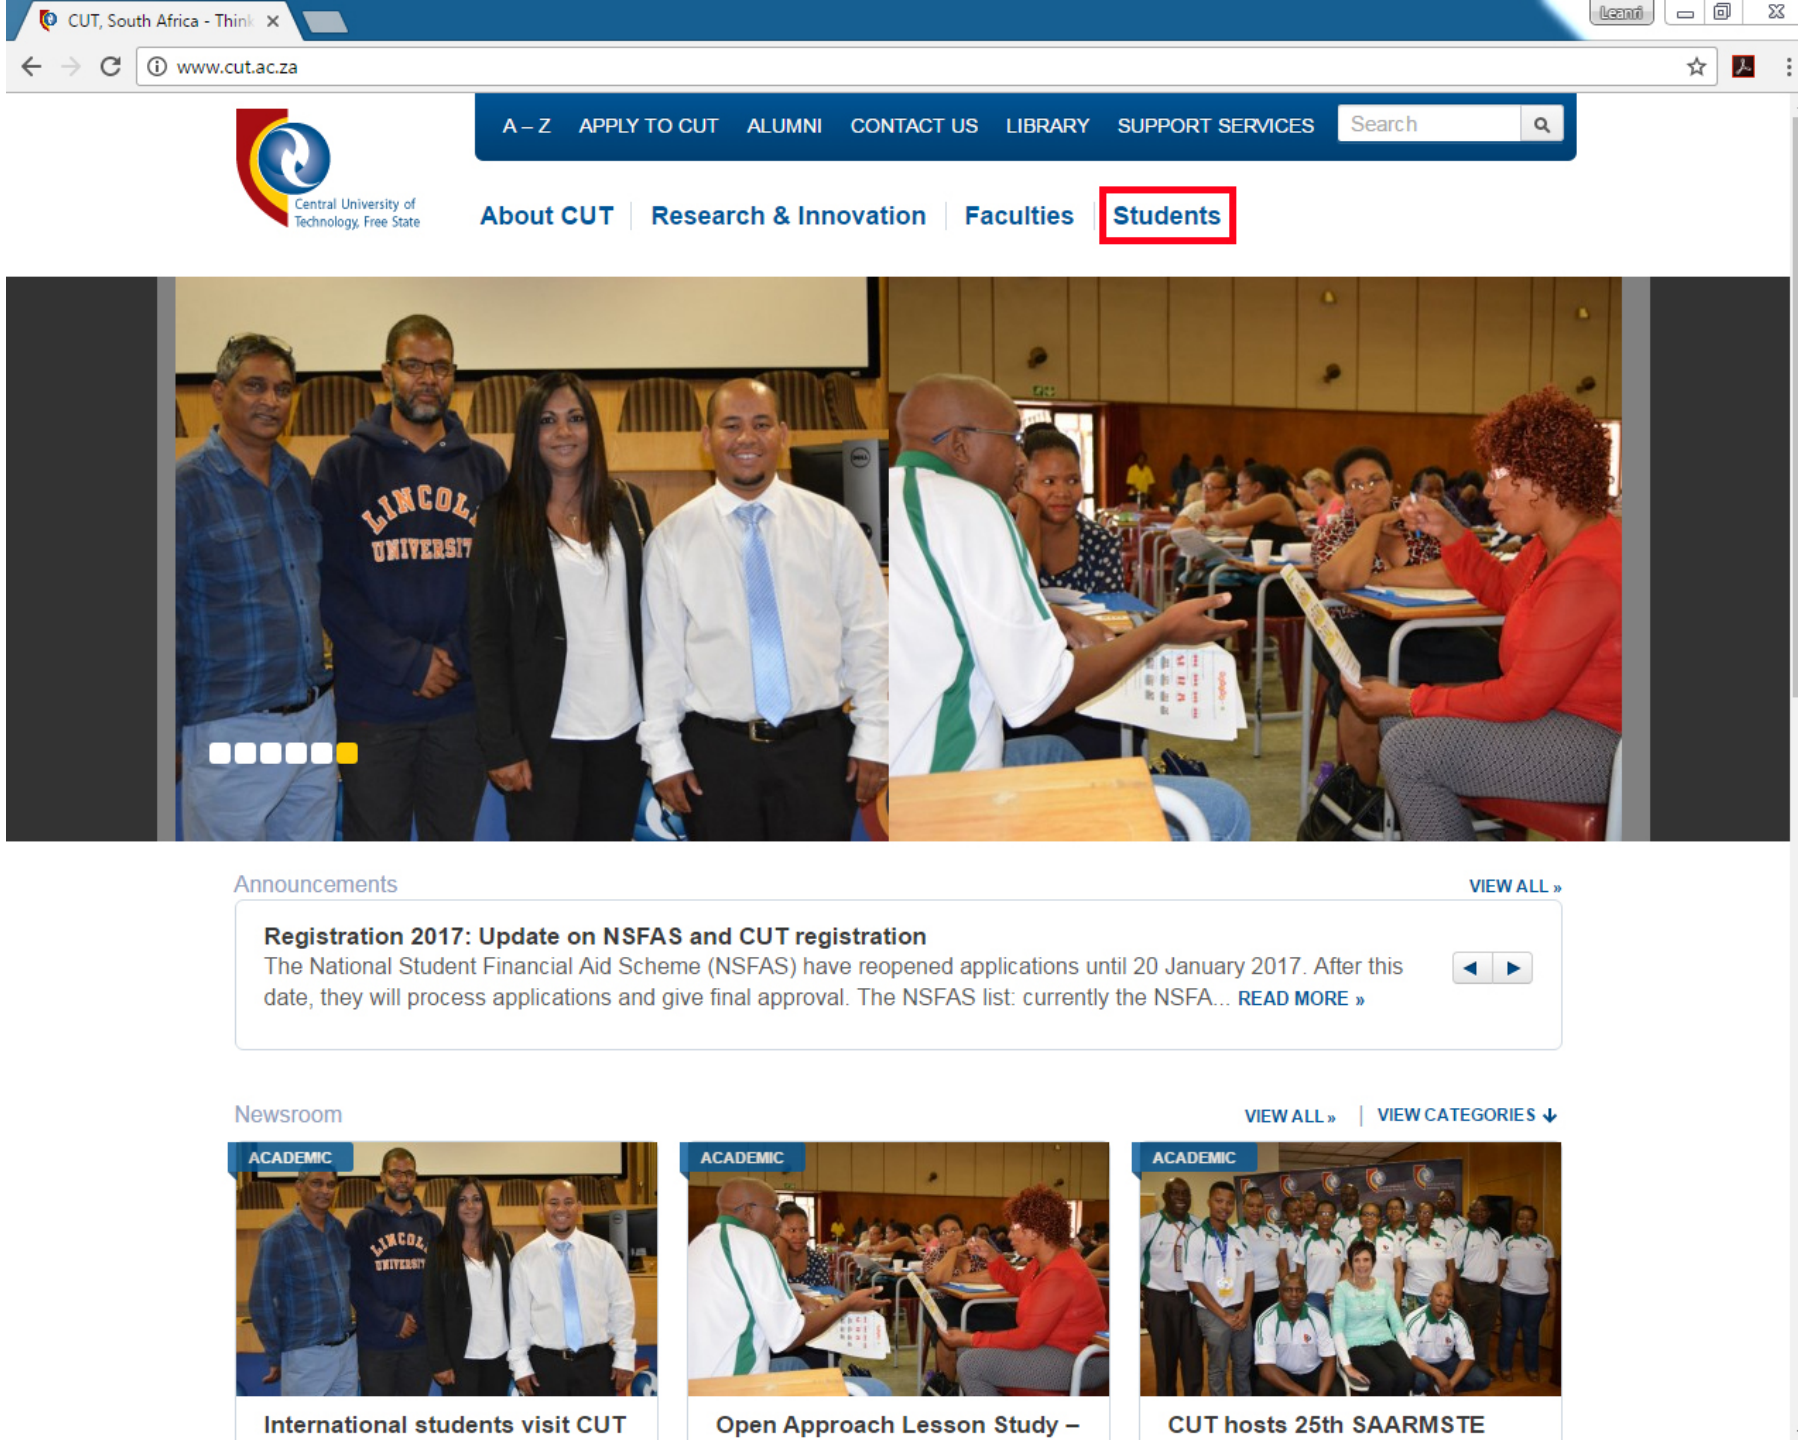
The second part shows how to reset the password. This action has to be performed on a monthly basis.

How to register your CUT/eThuto password

One time only

Step 1.

On the CUT webpage, hover the cursor over the Students drop down menu

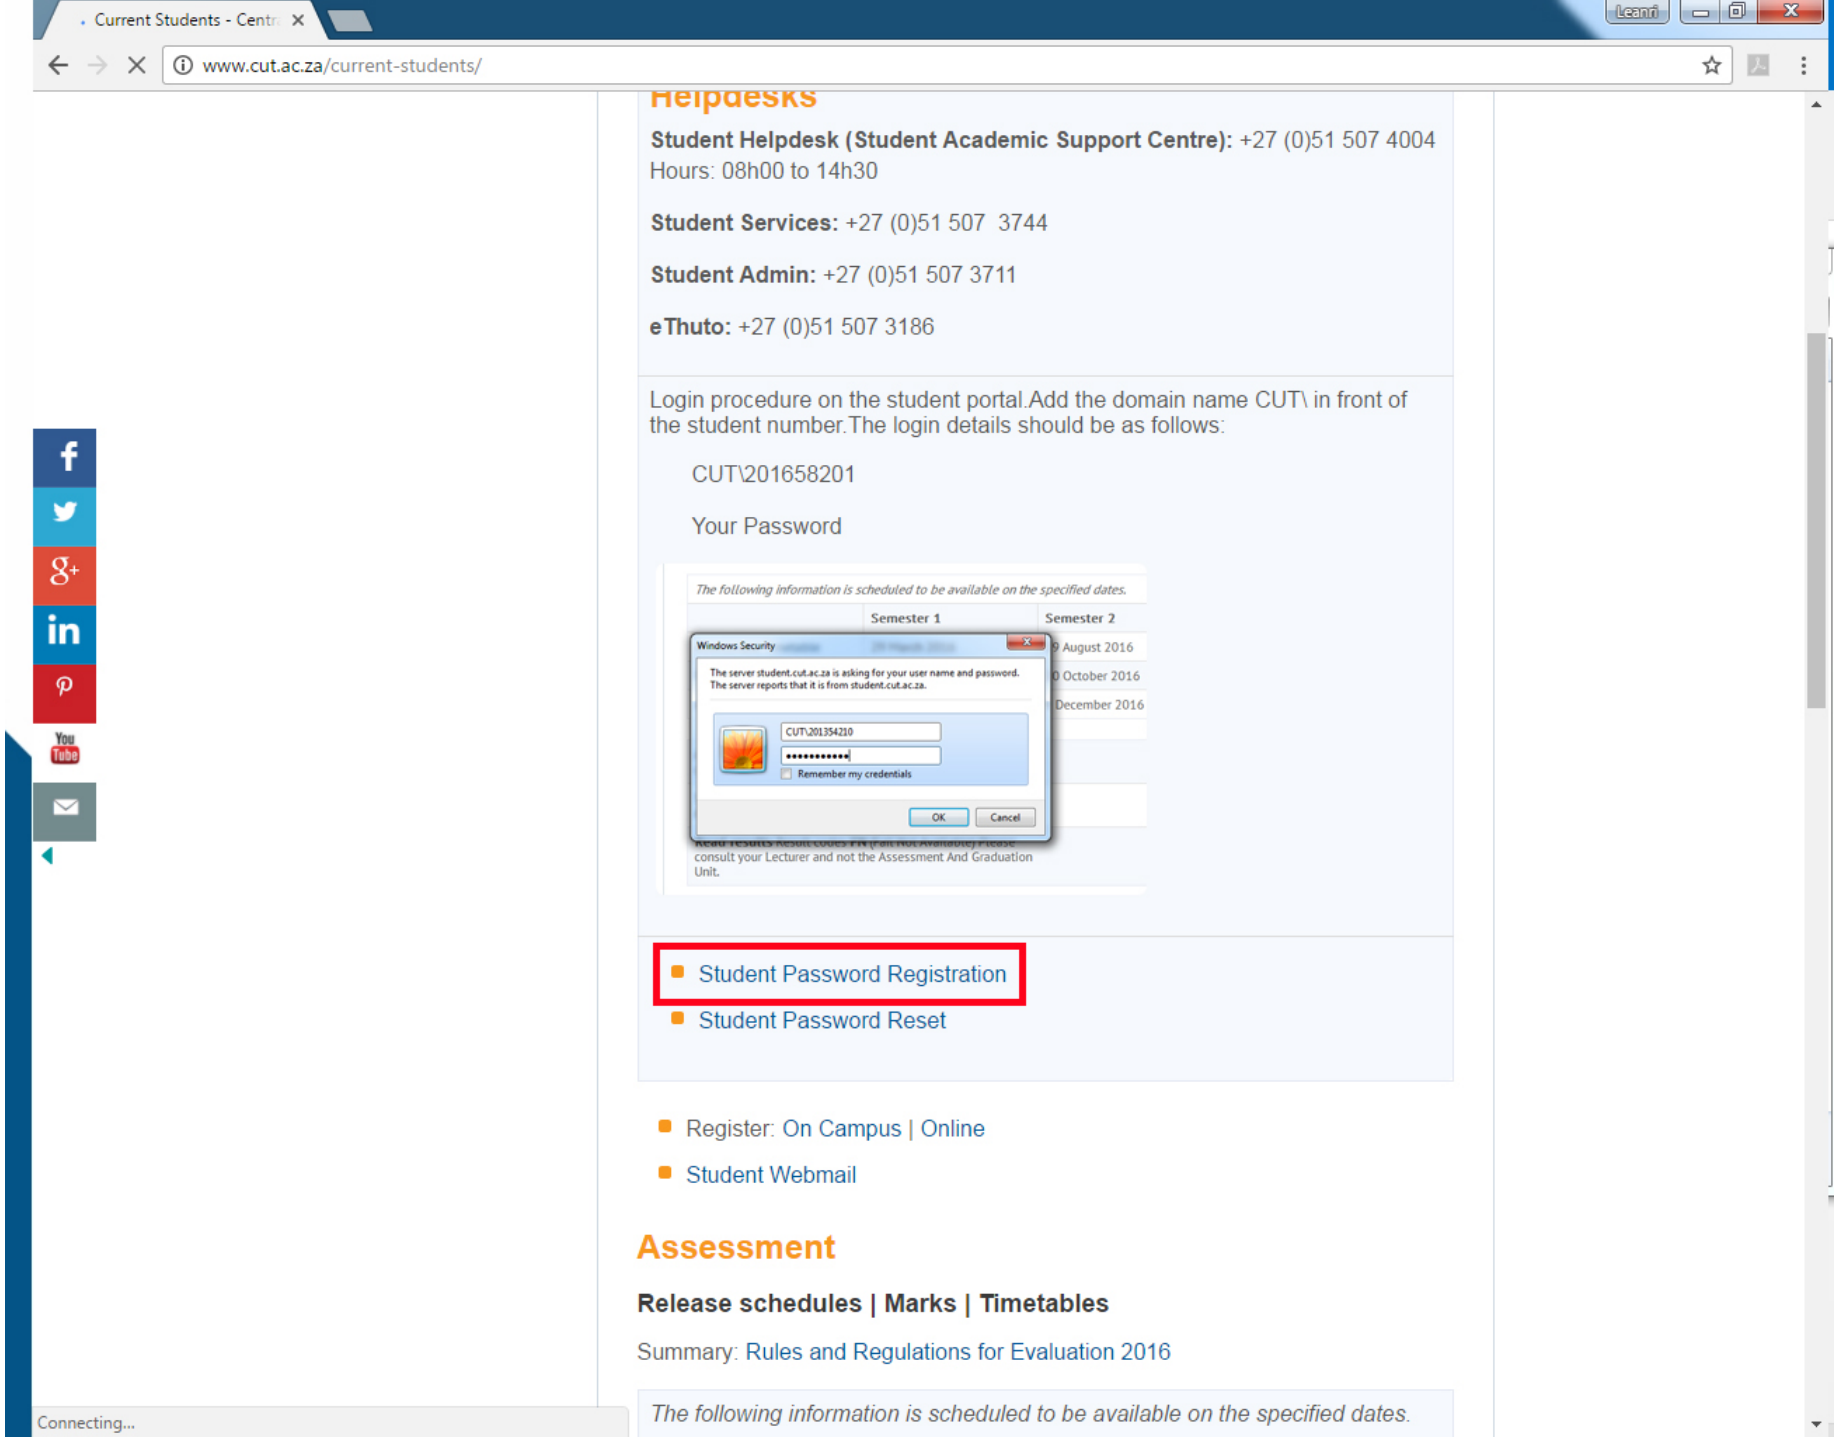


Step 2.

Click on the Current Students tab

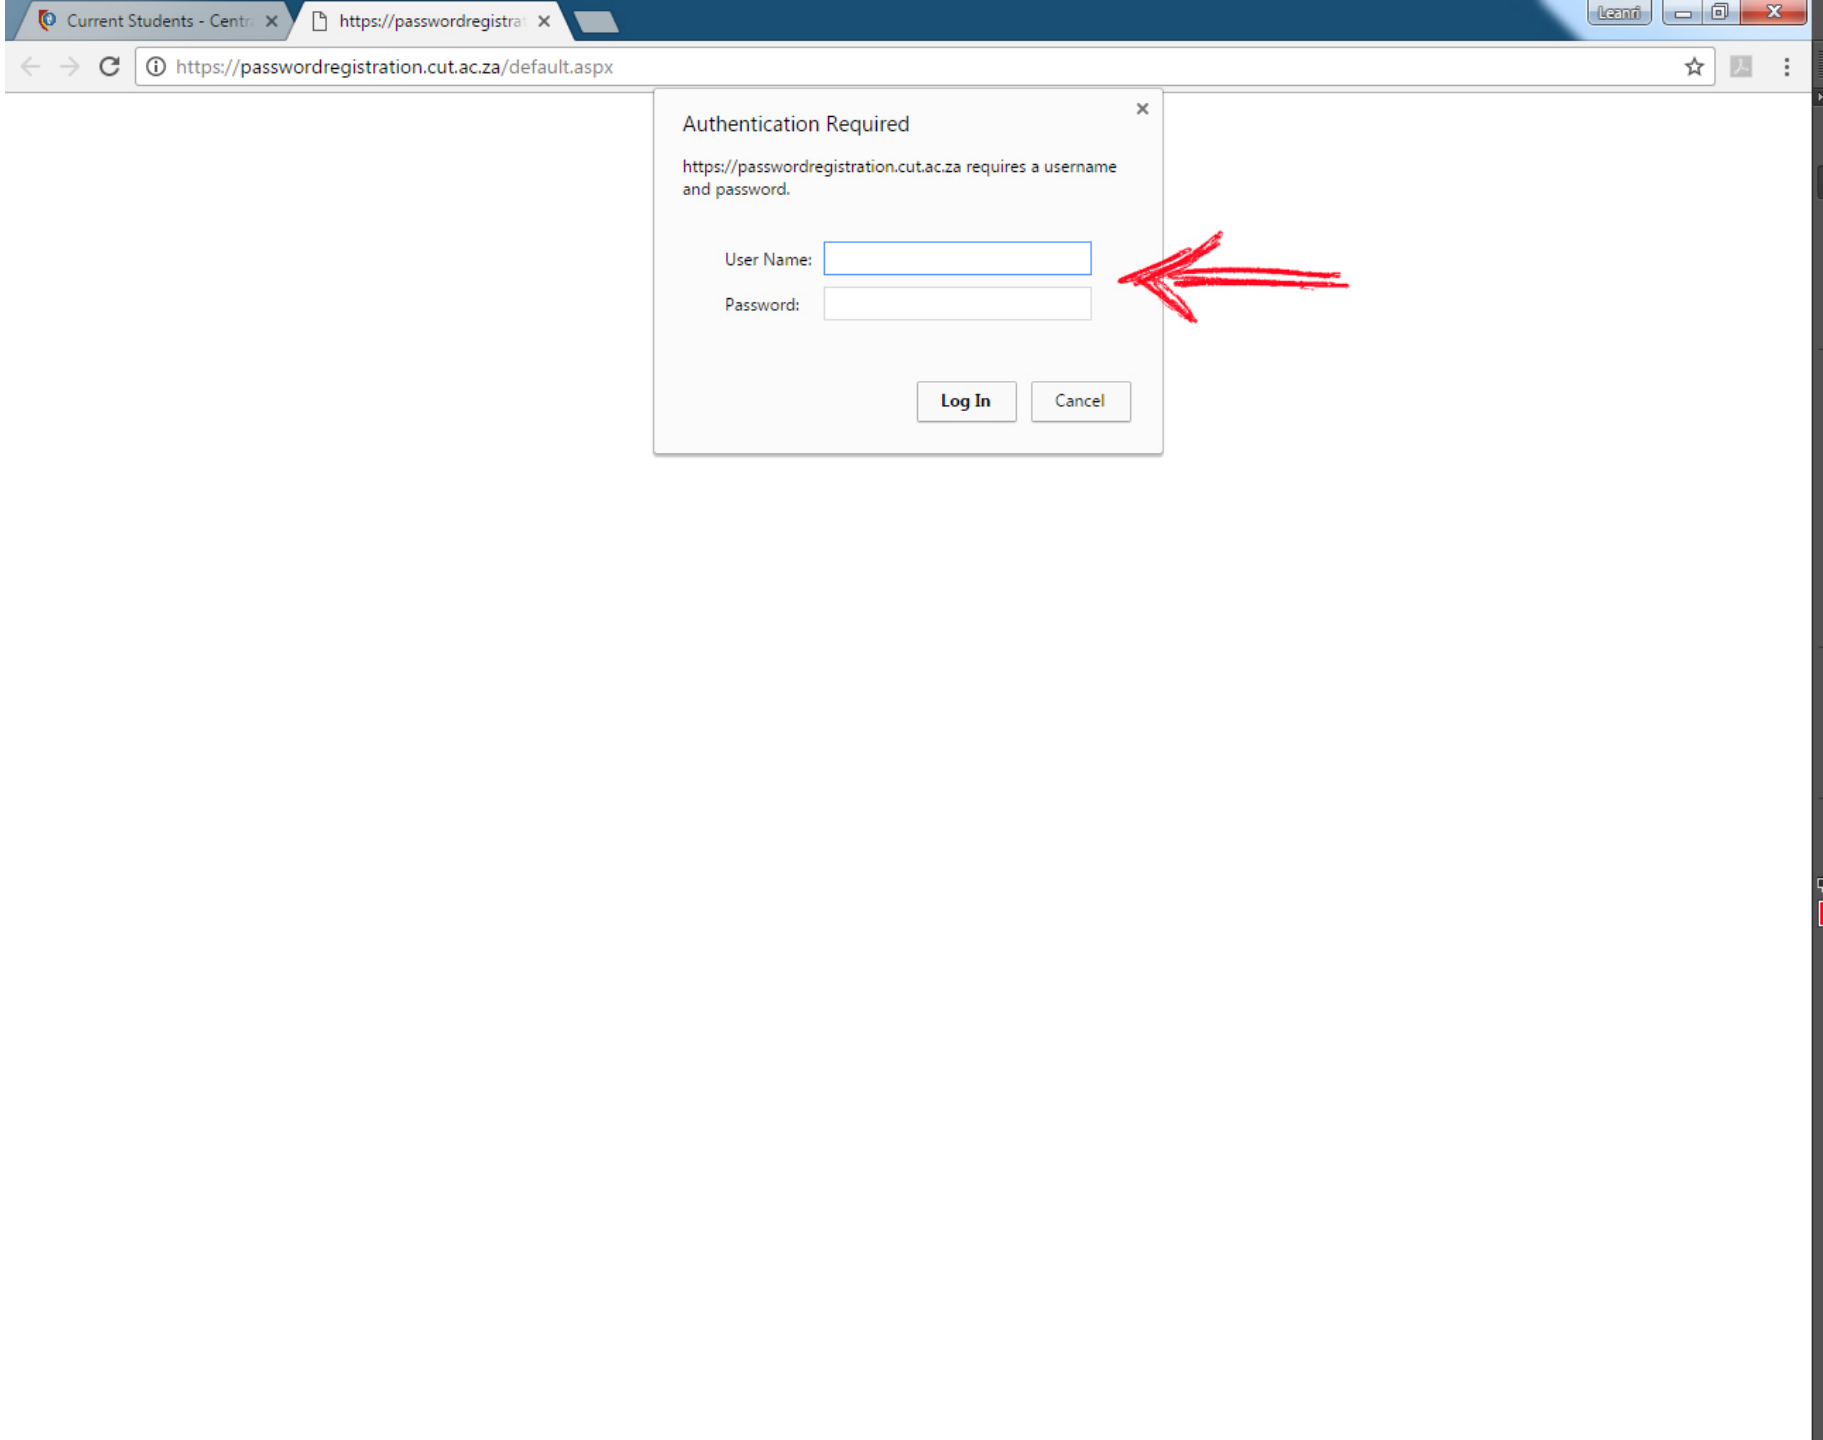
Step 3.

Scroll down and click on Student Password Registration



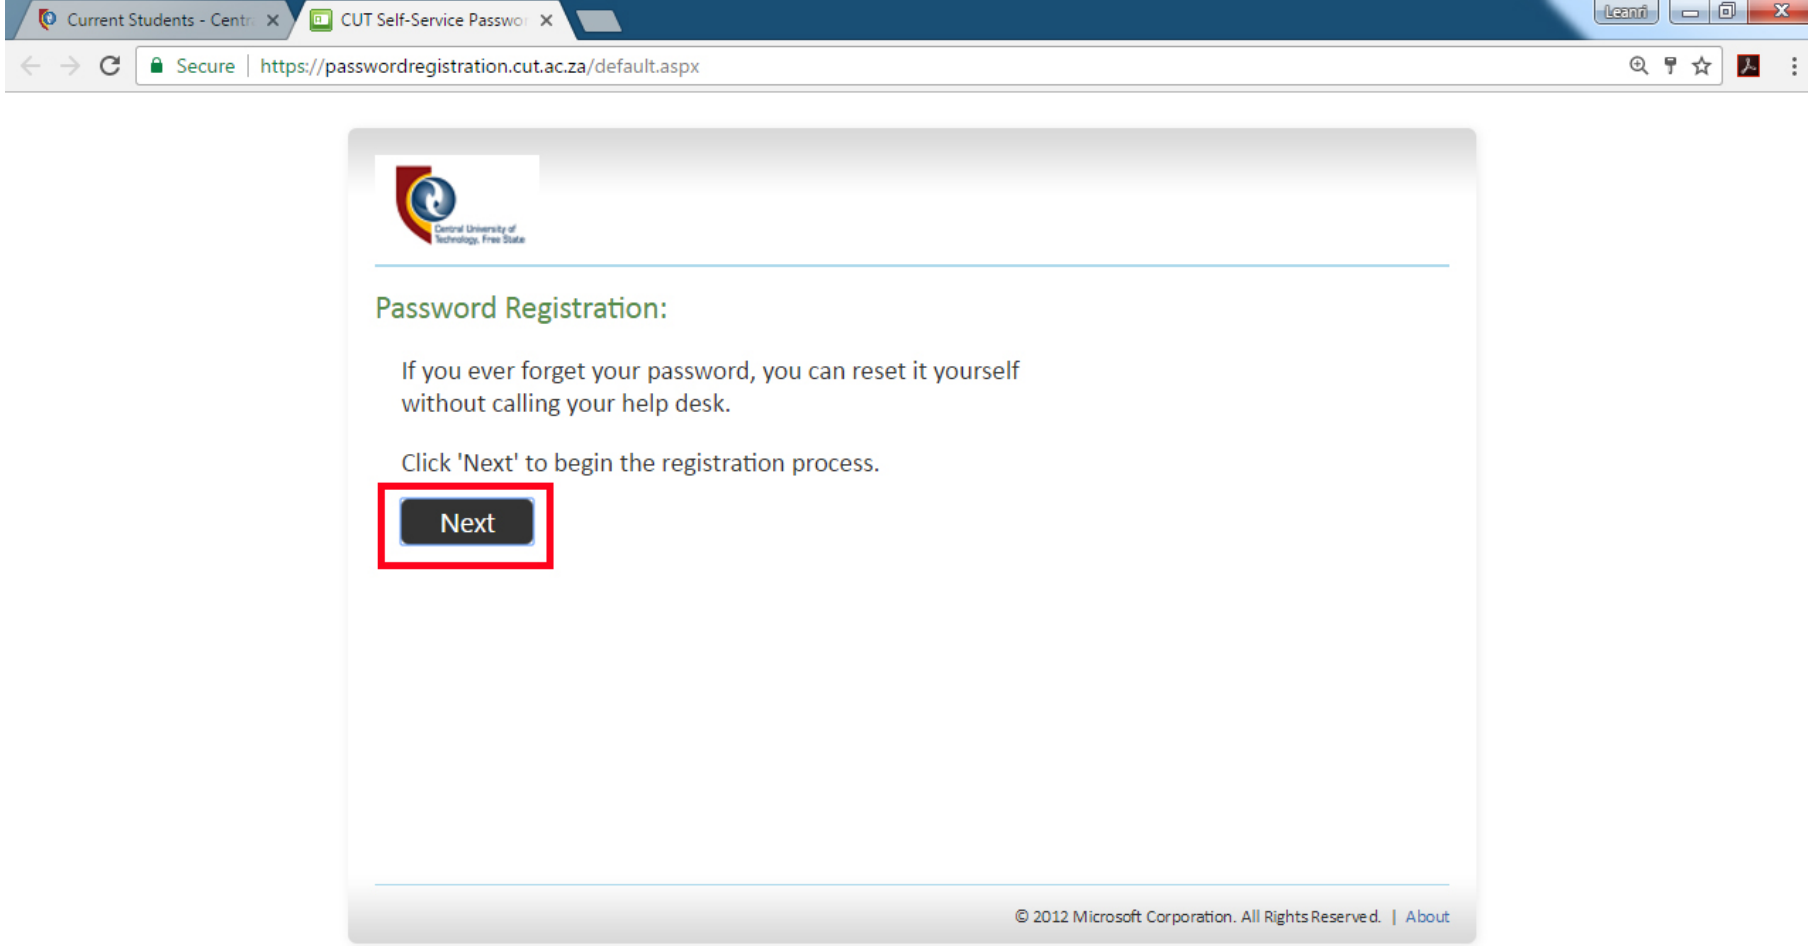
Step 4.

Type your current username and password into the box provided



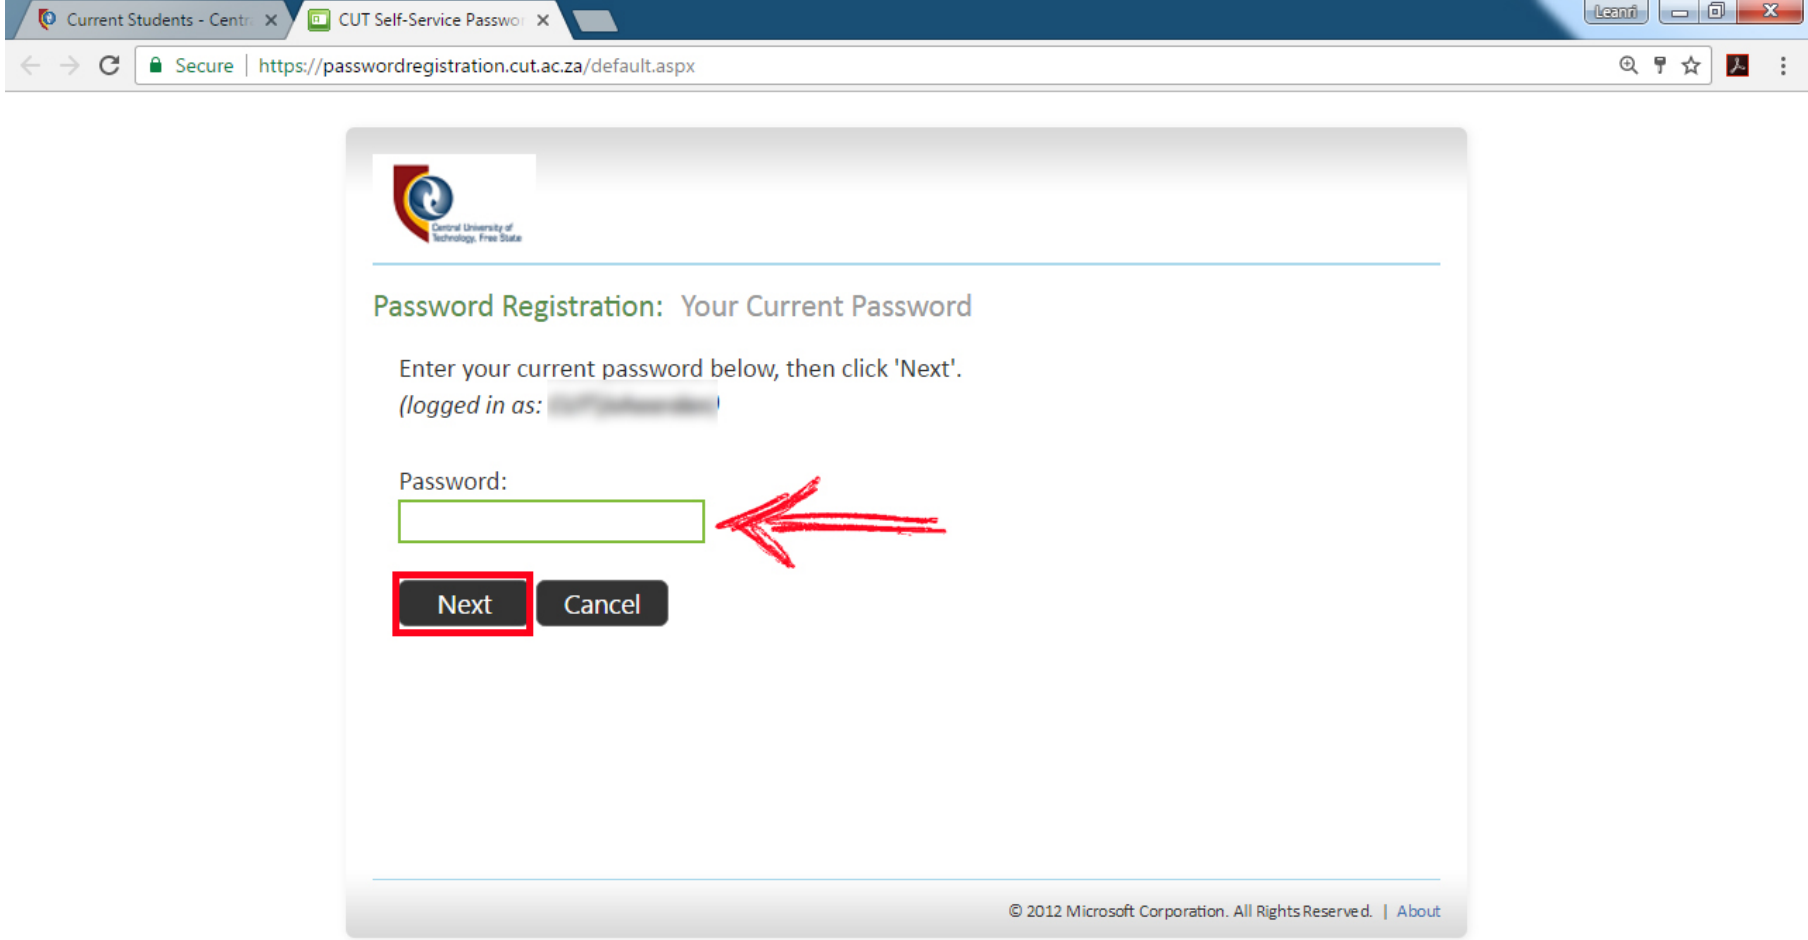
Step 5.

You will be redirected to a new window. Click Next to proceed



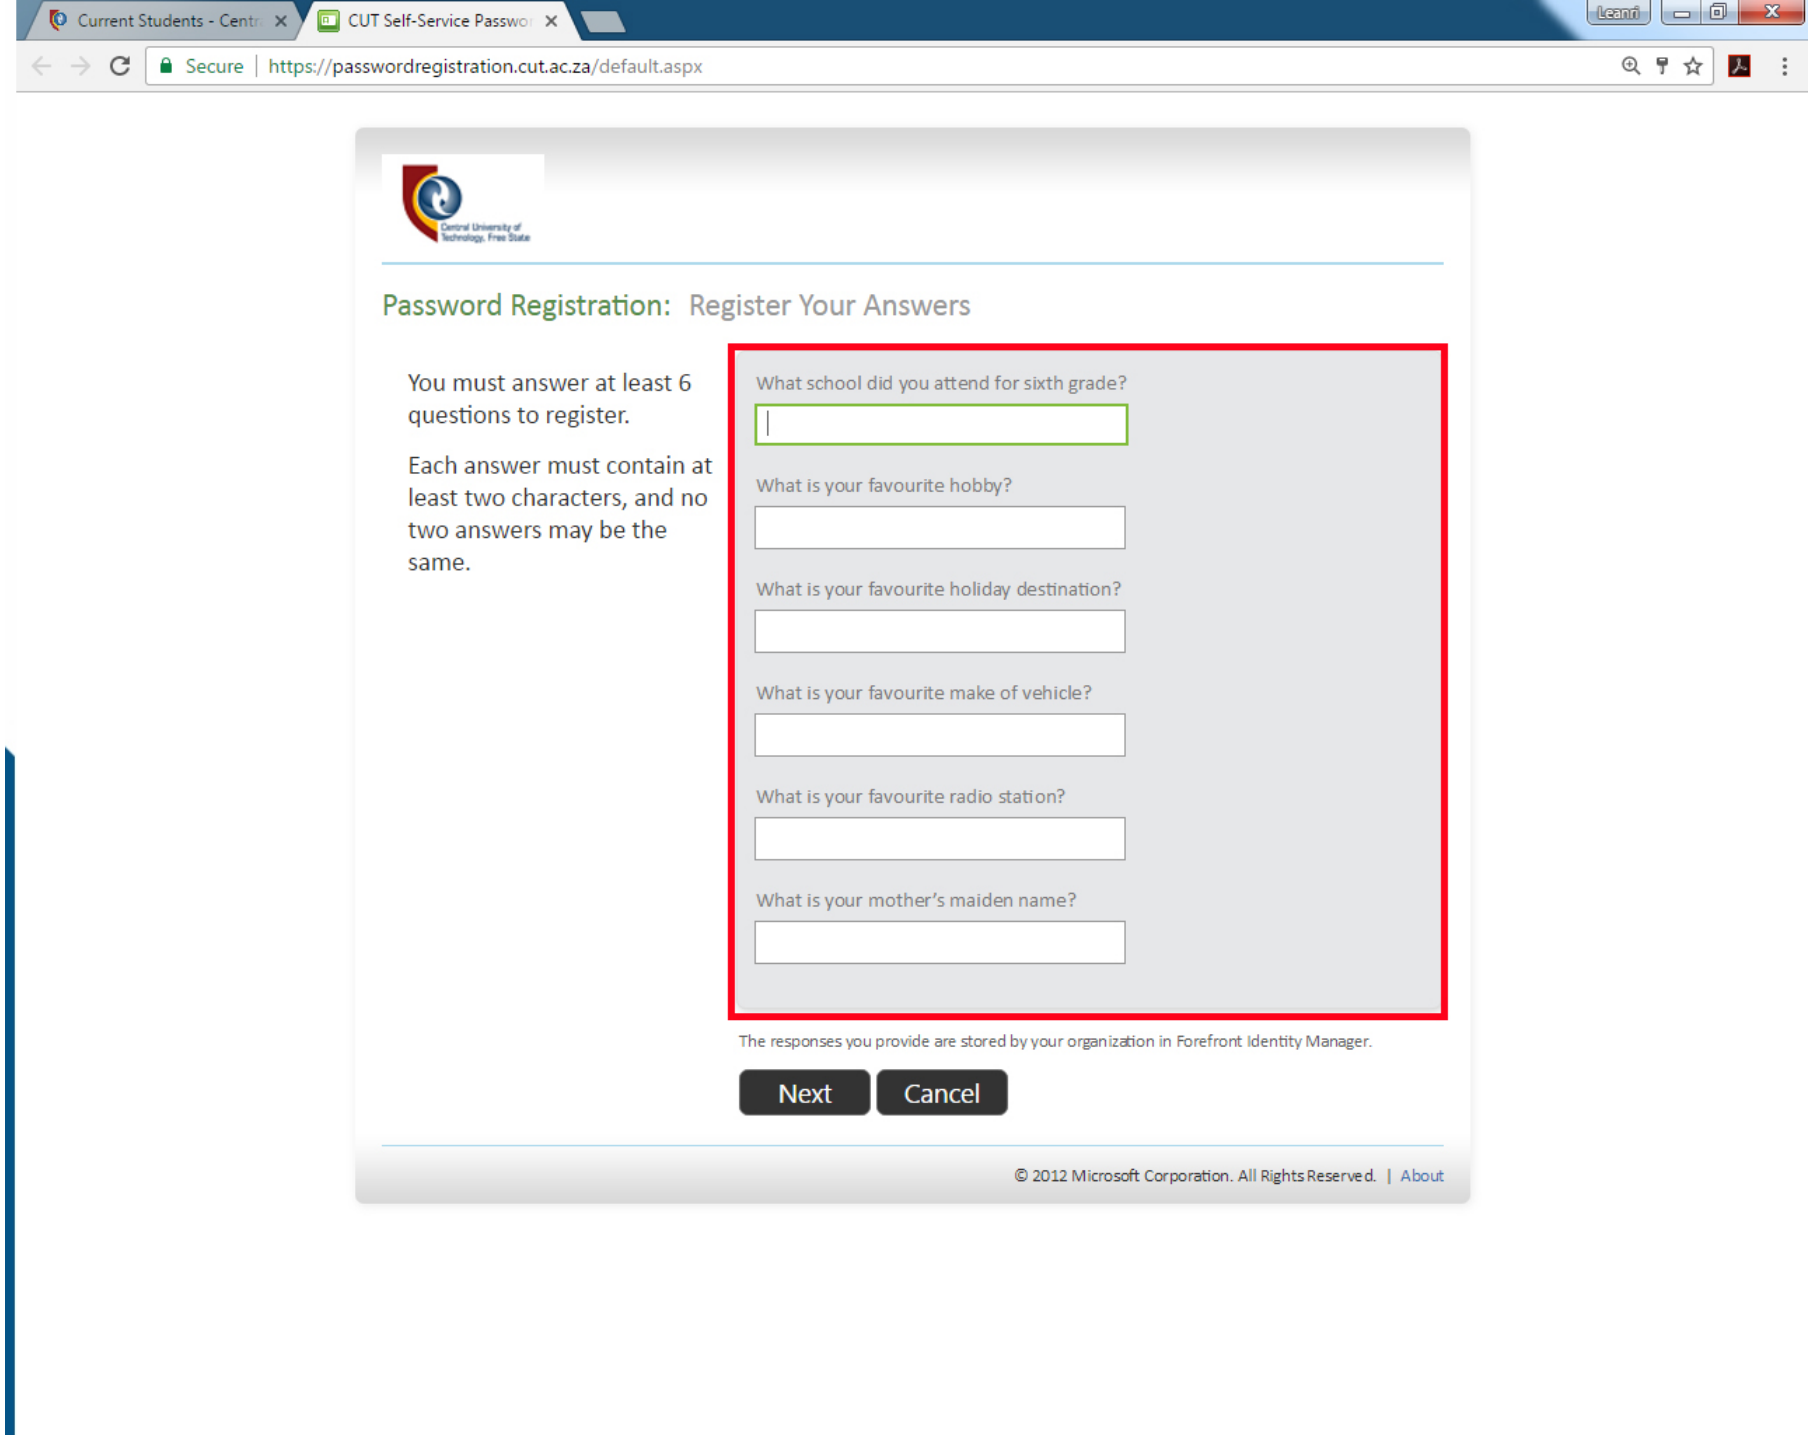
Step 6.

Type your current password into the box provided, then click Next



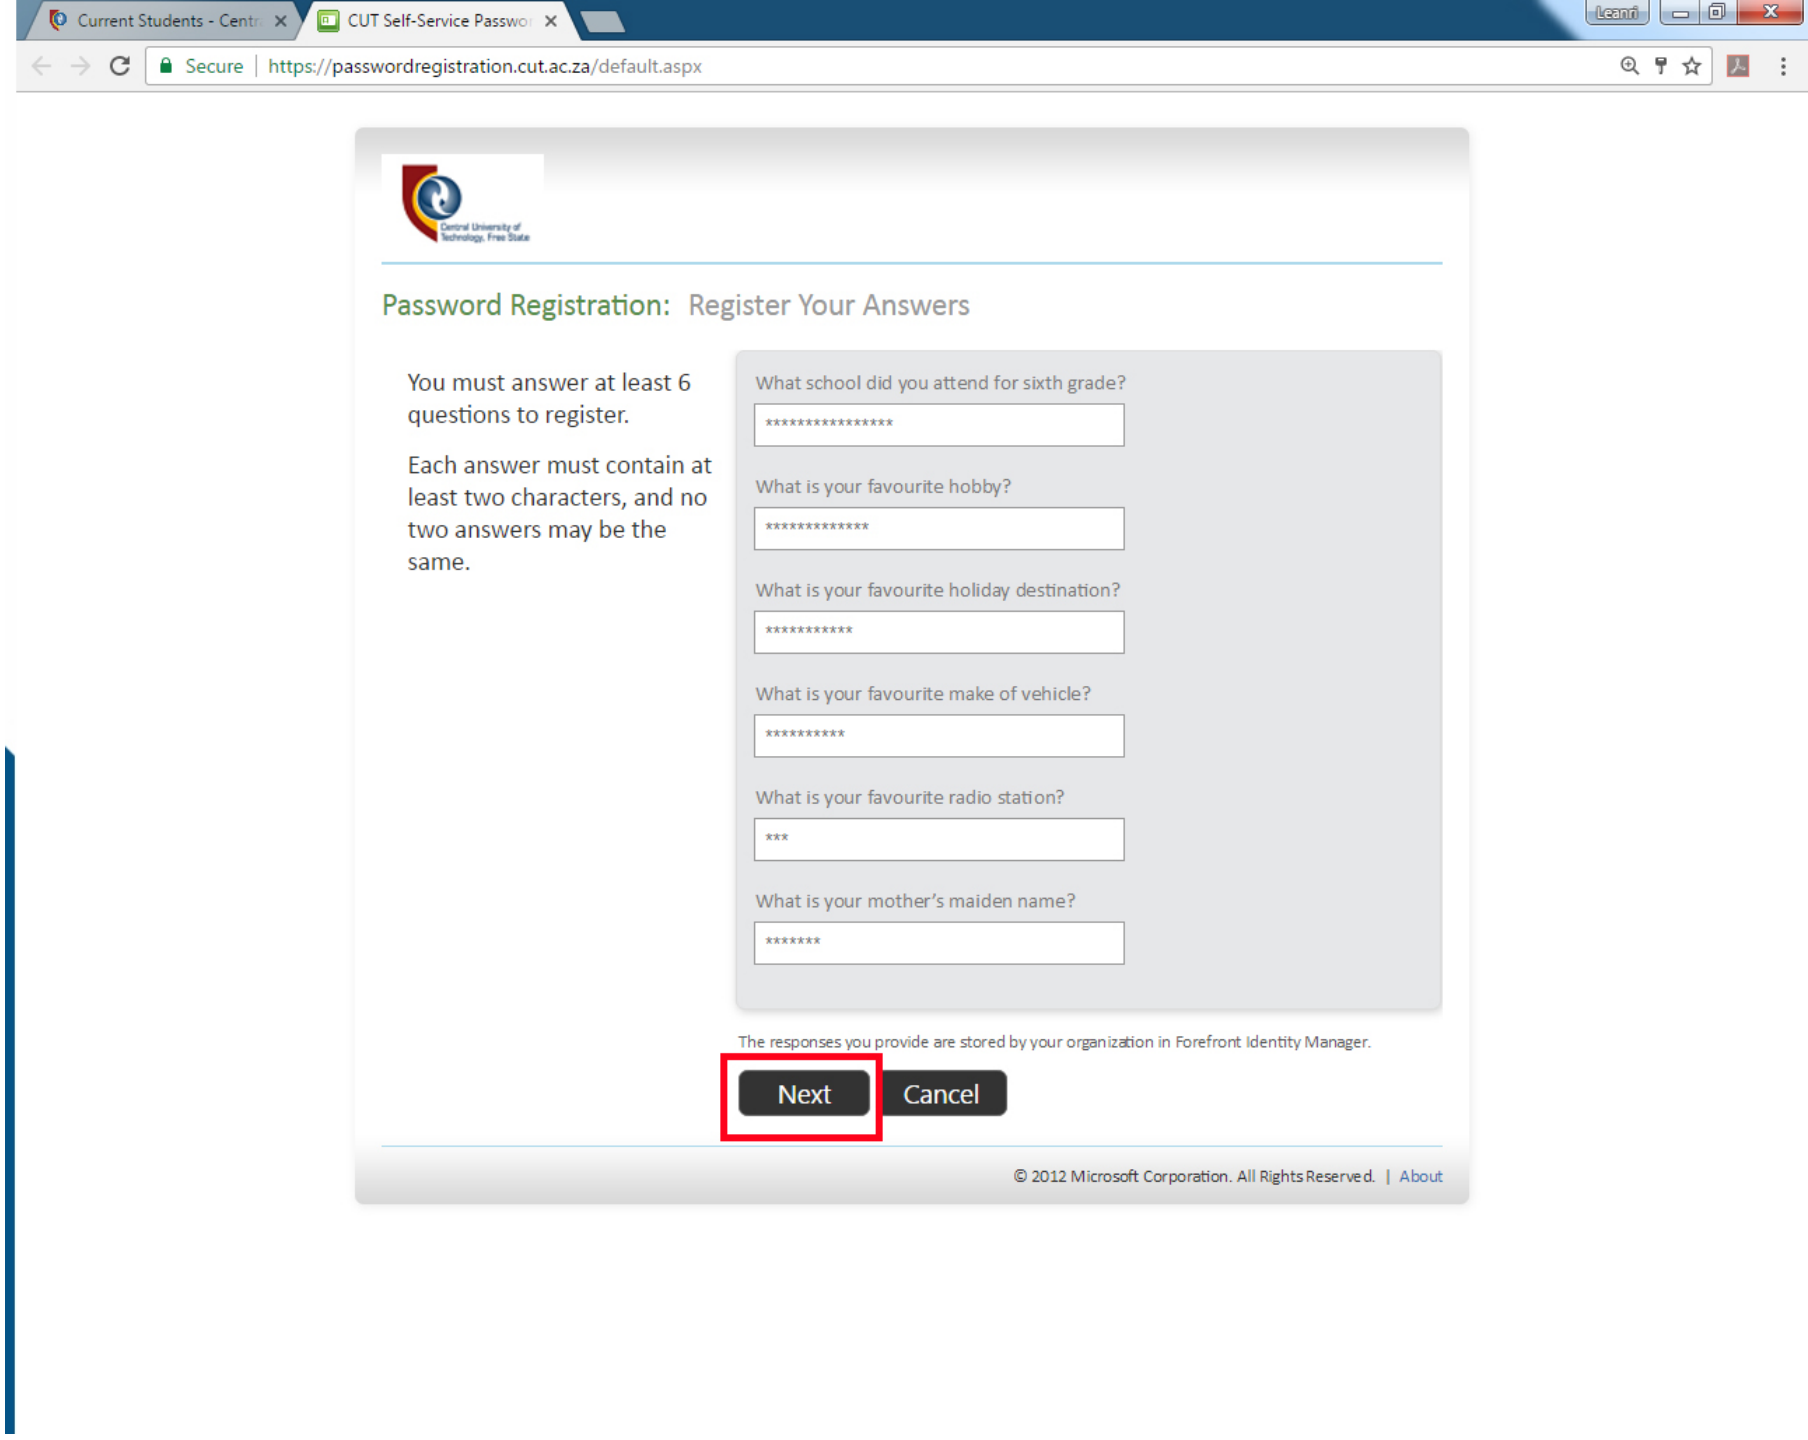
Step 7.

Provide answers to six security questions in the boxes provided. You will be prompted to provide these answers should you ever want to reset your password



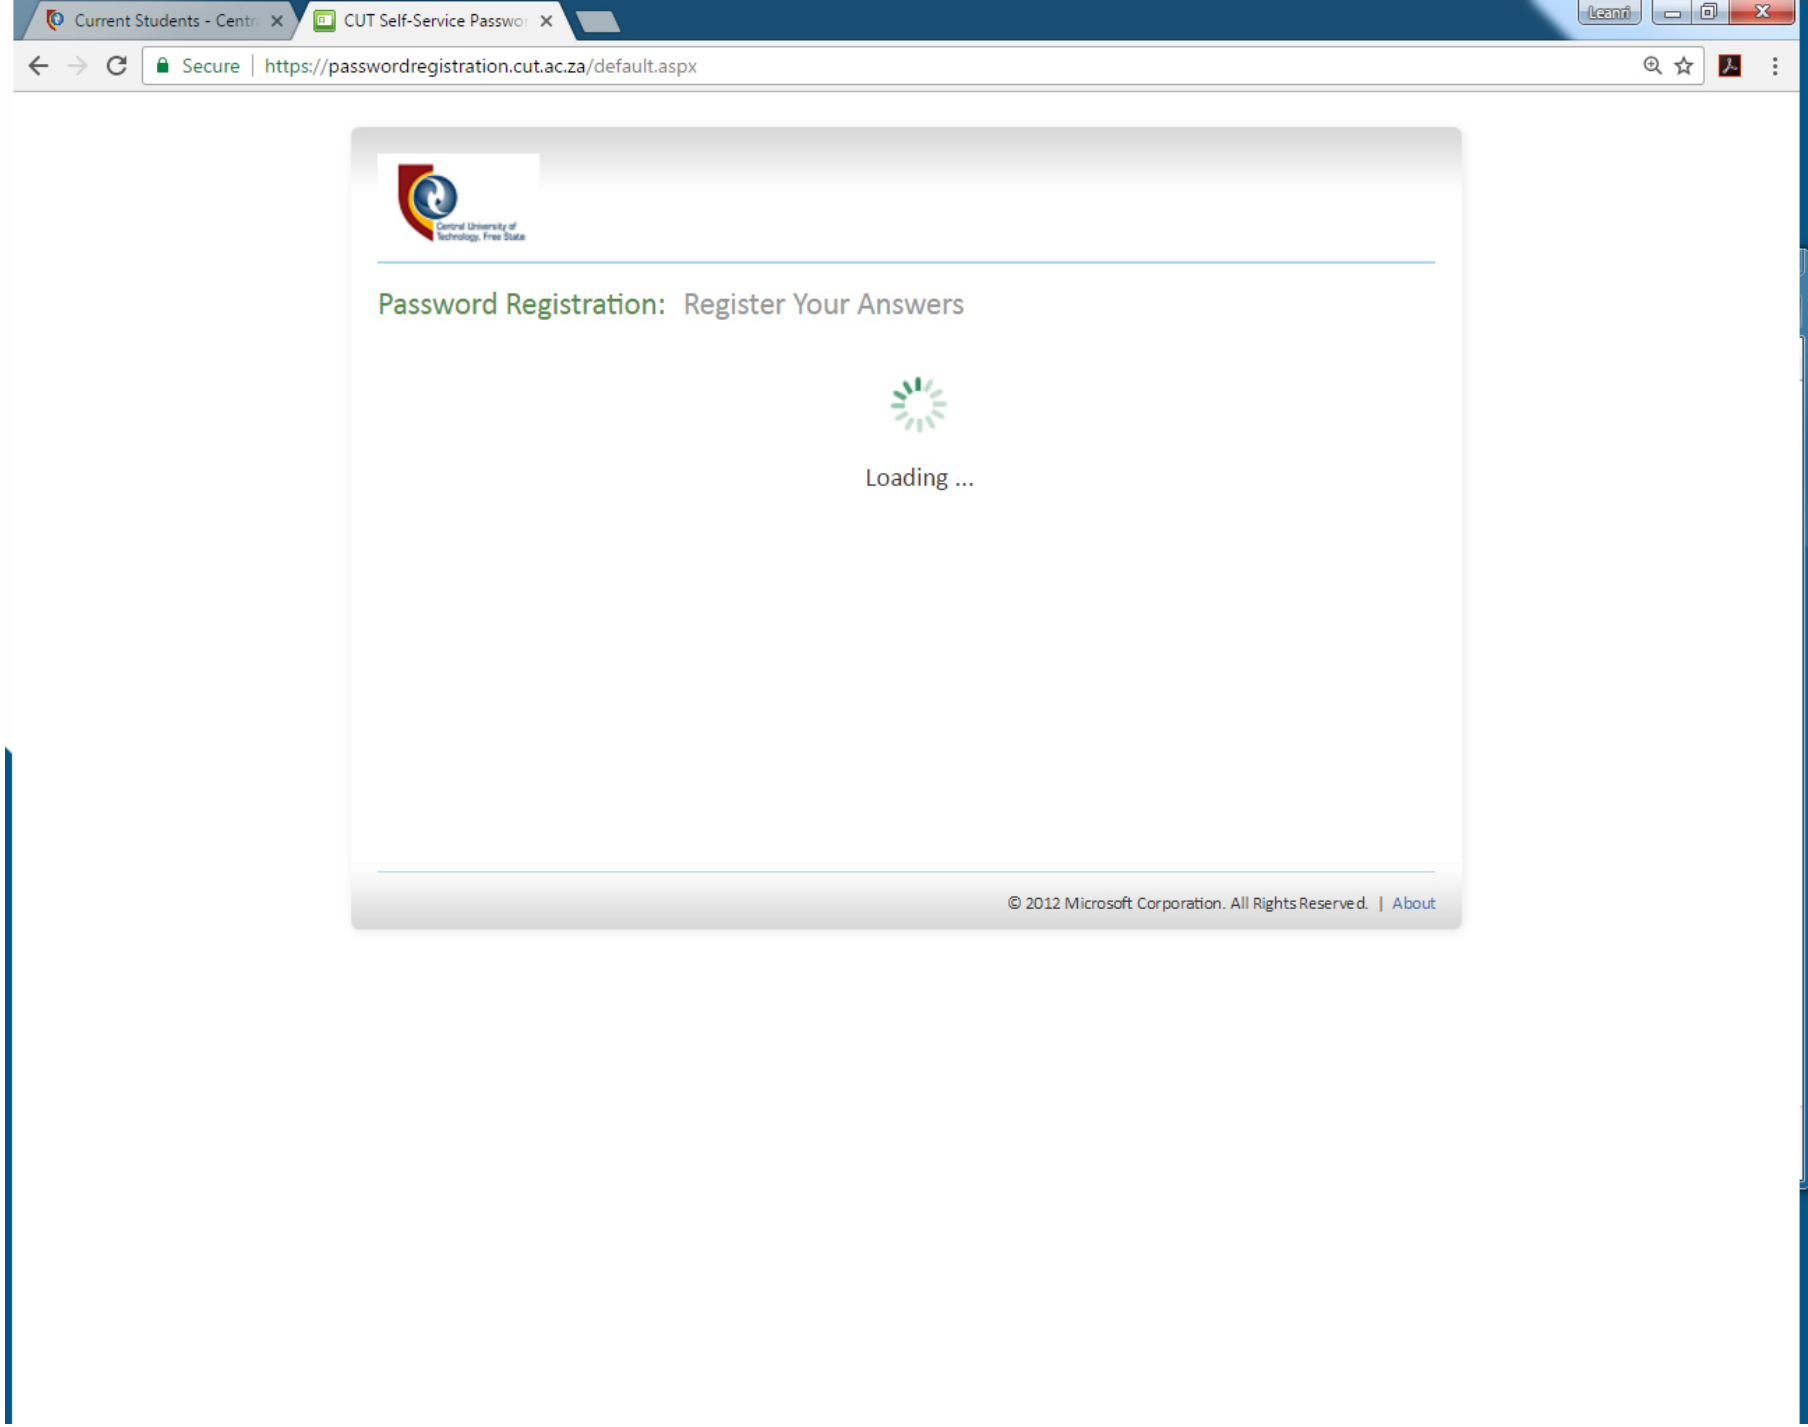
Step 8.

After you have typed in the answers click Next



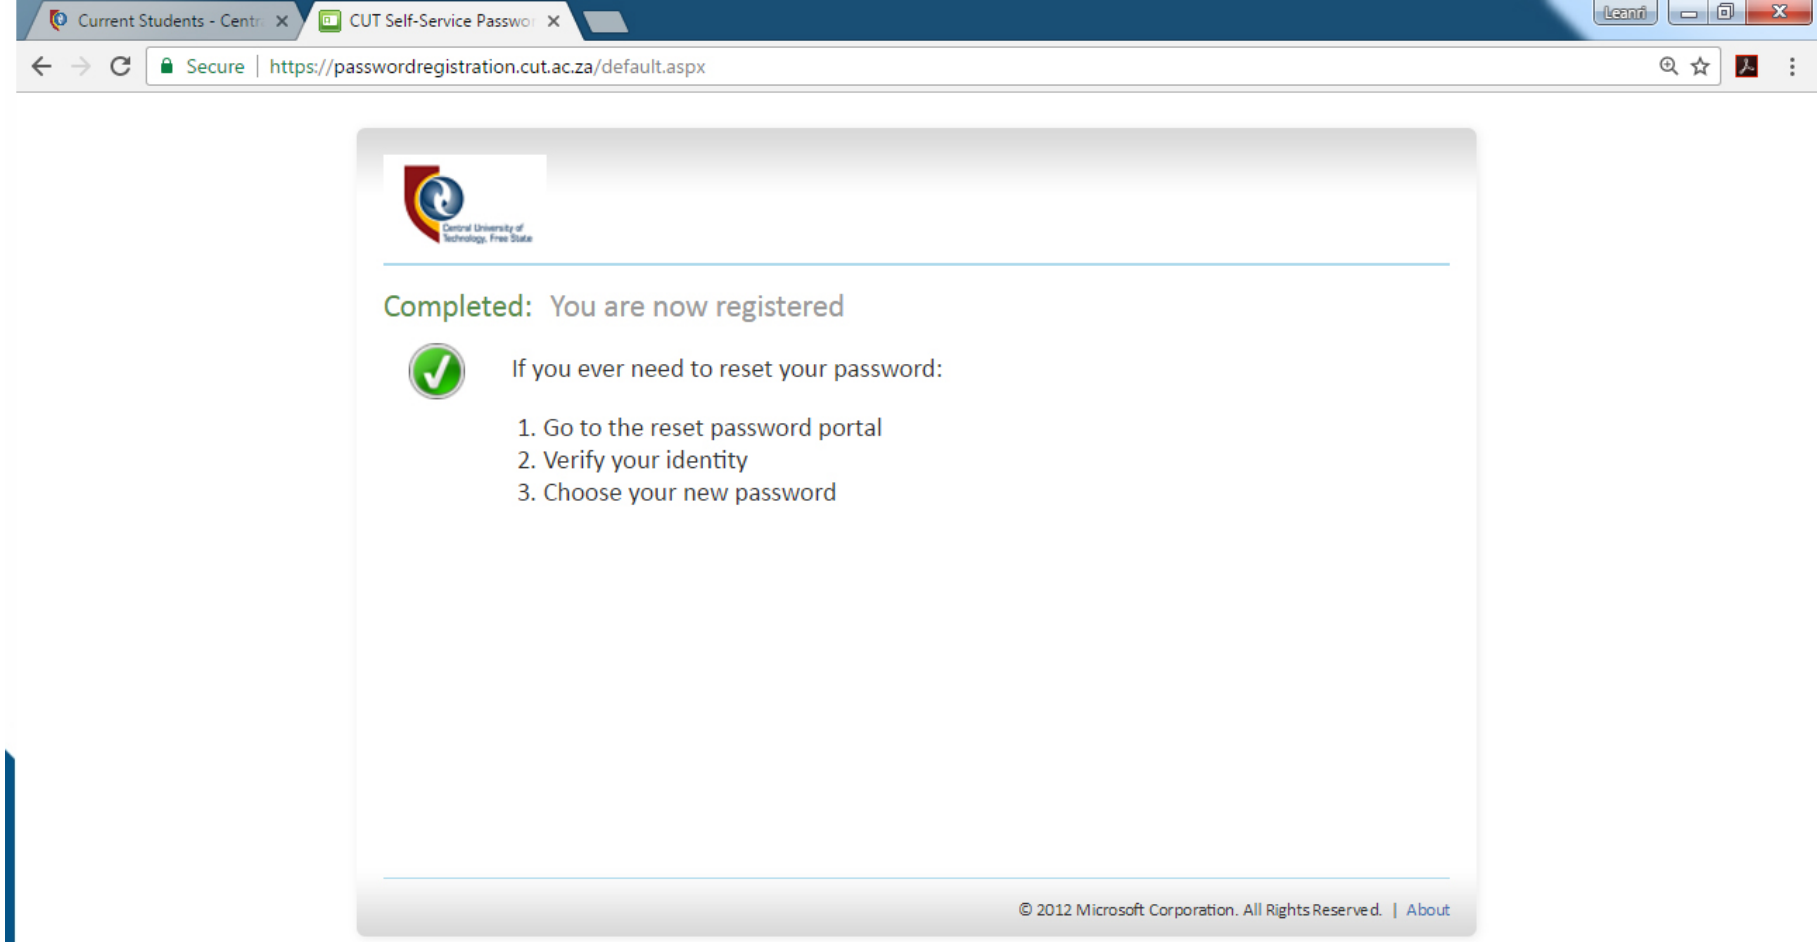
Step 9.

The system will take a couple of seconds to register your password



All done.

You have successfully registered your password. You only need to do this once.

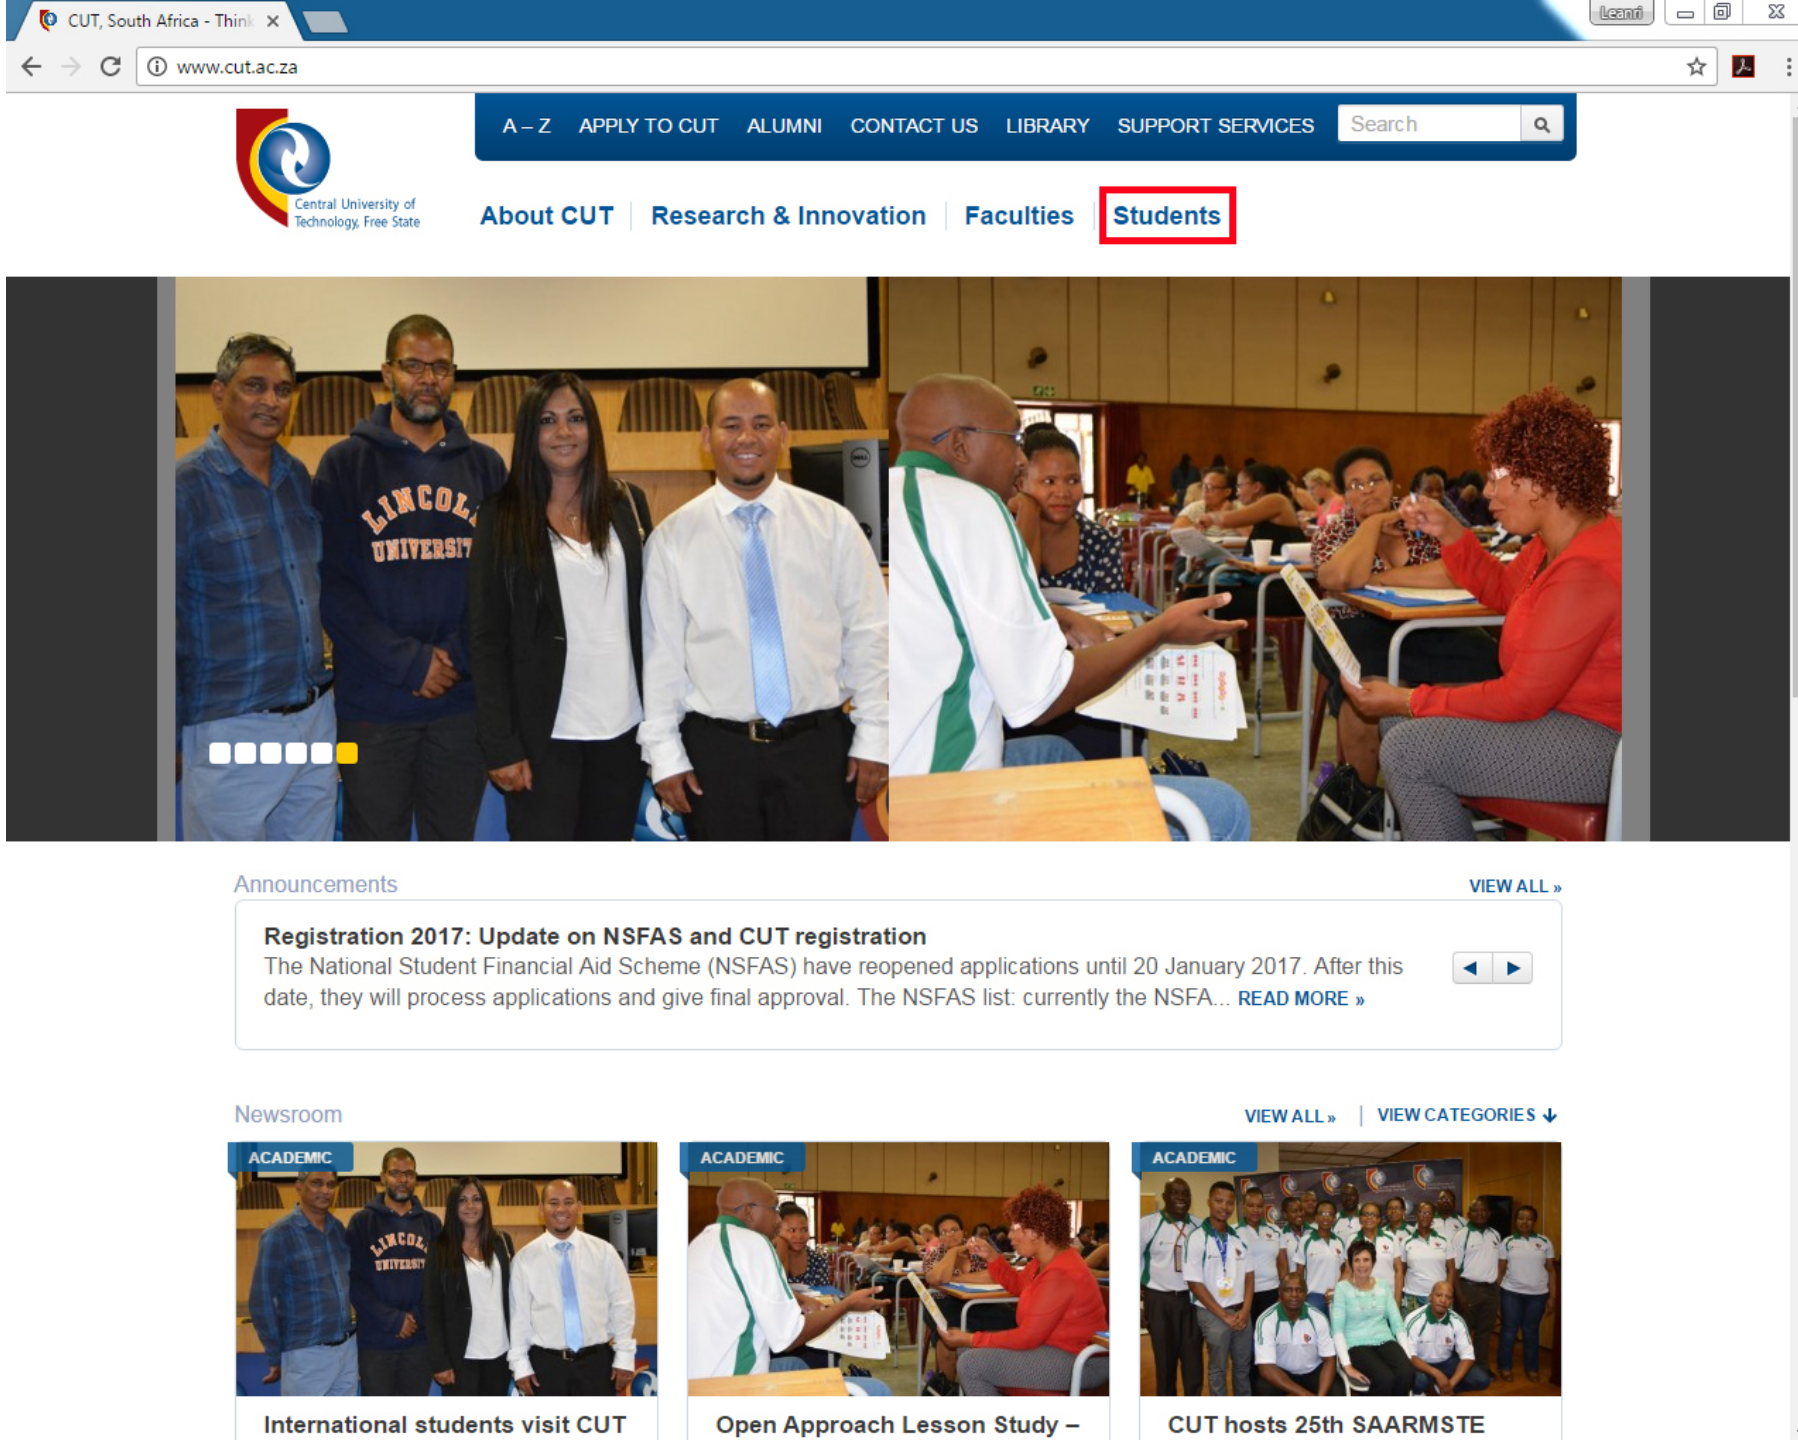


How to reset your CUT/eThuto password

Monthly basis

Step 1.

On the CUT webpage, hover the cursor over the Students drop down menu

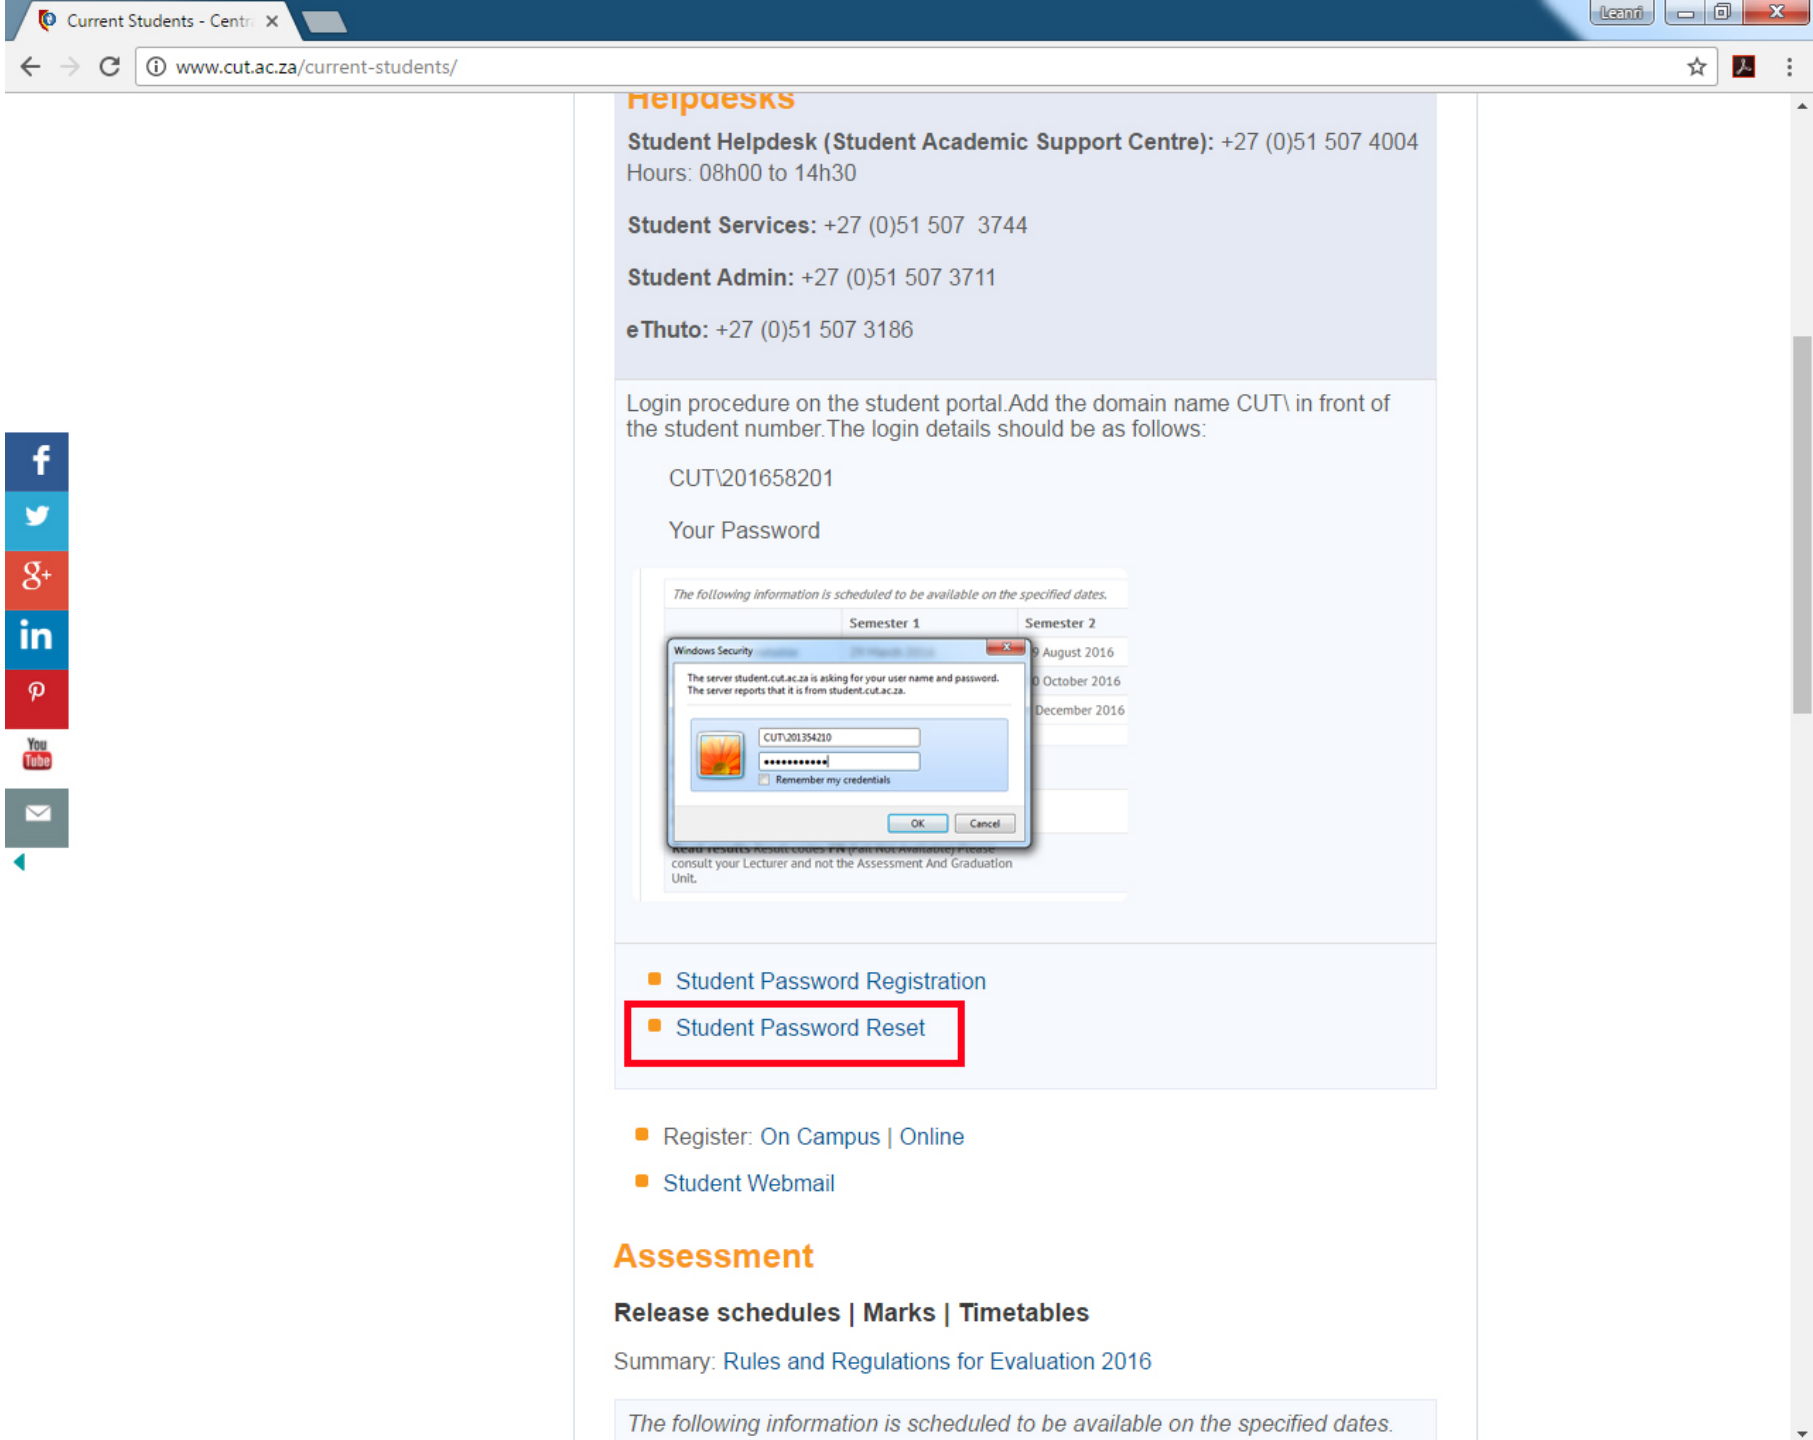


Step 2.

Click on the Current Students tab

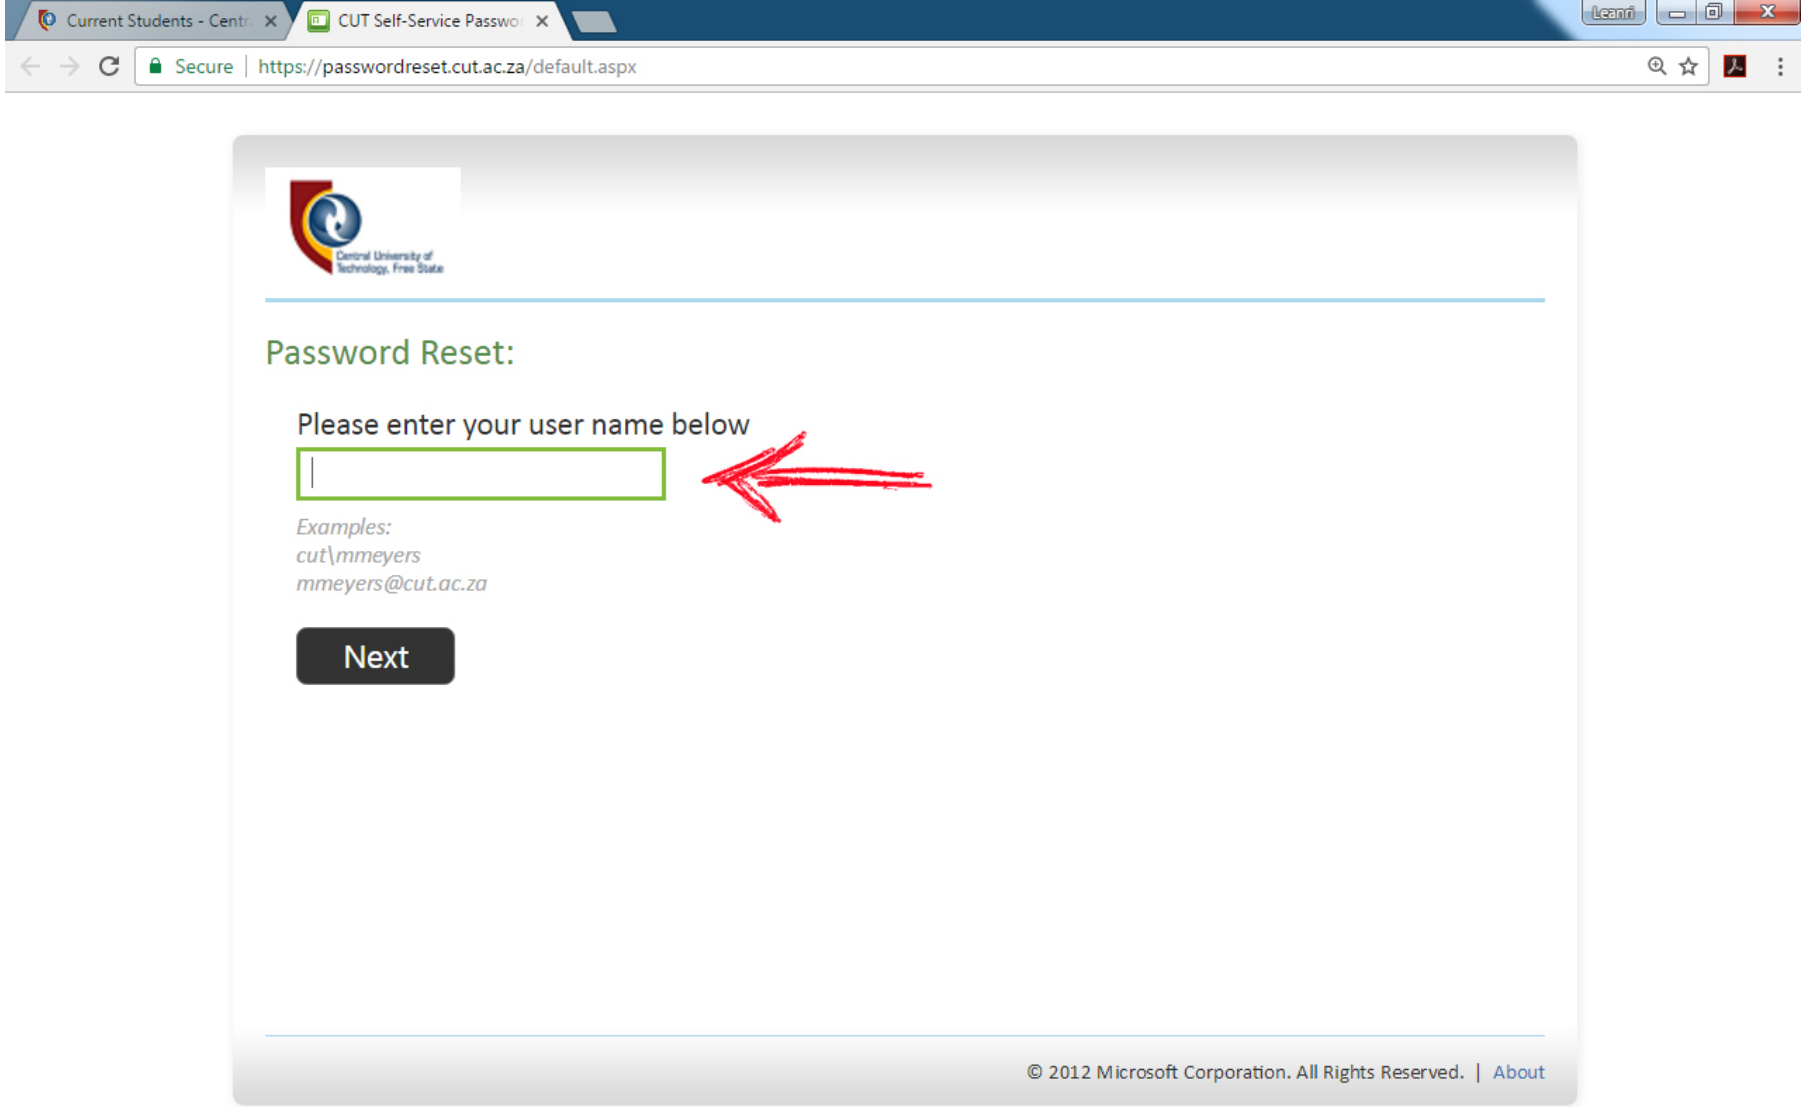
Step 3.

Scroll down and click on Student Password Reset



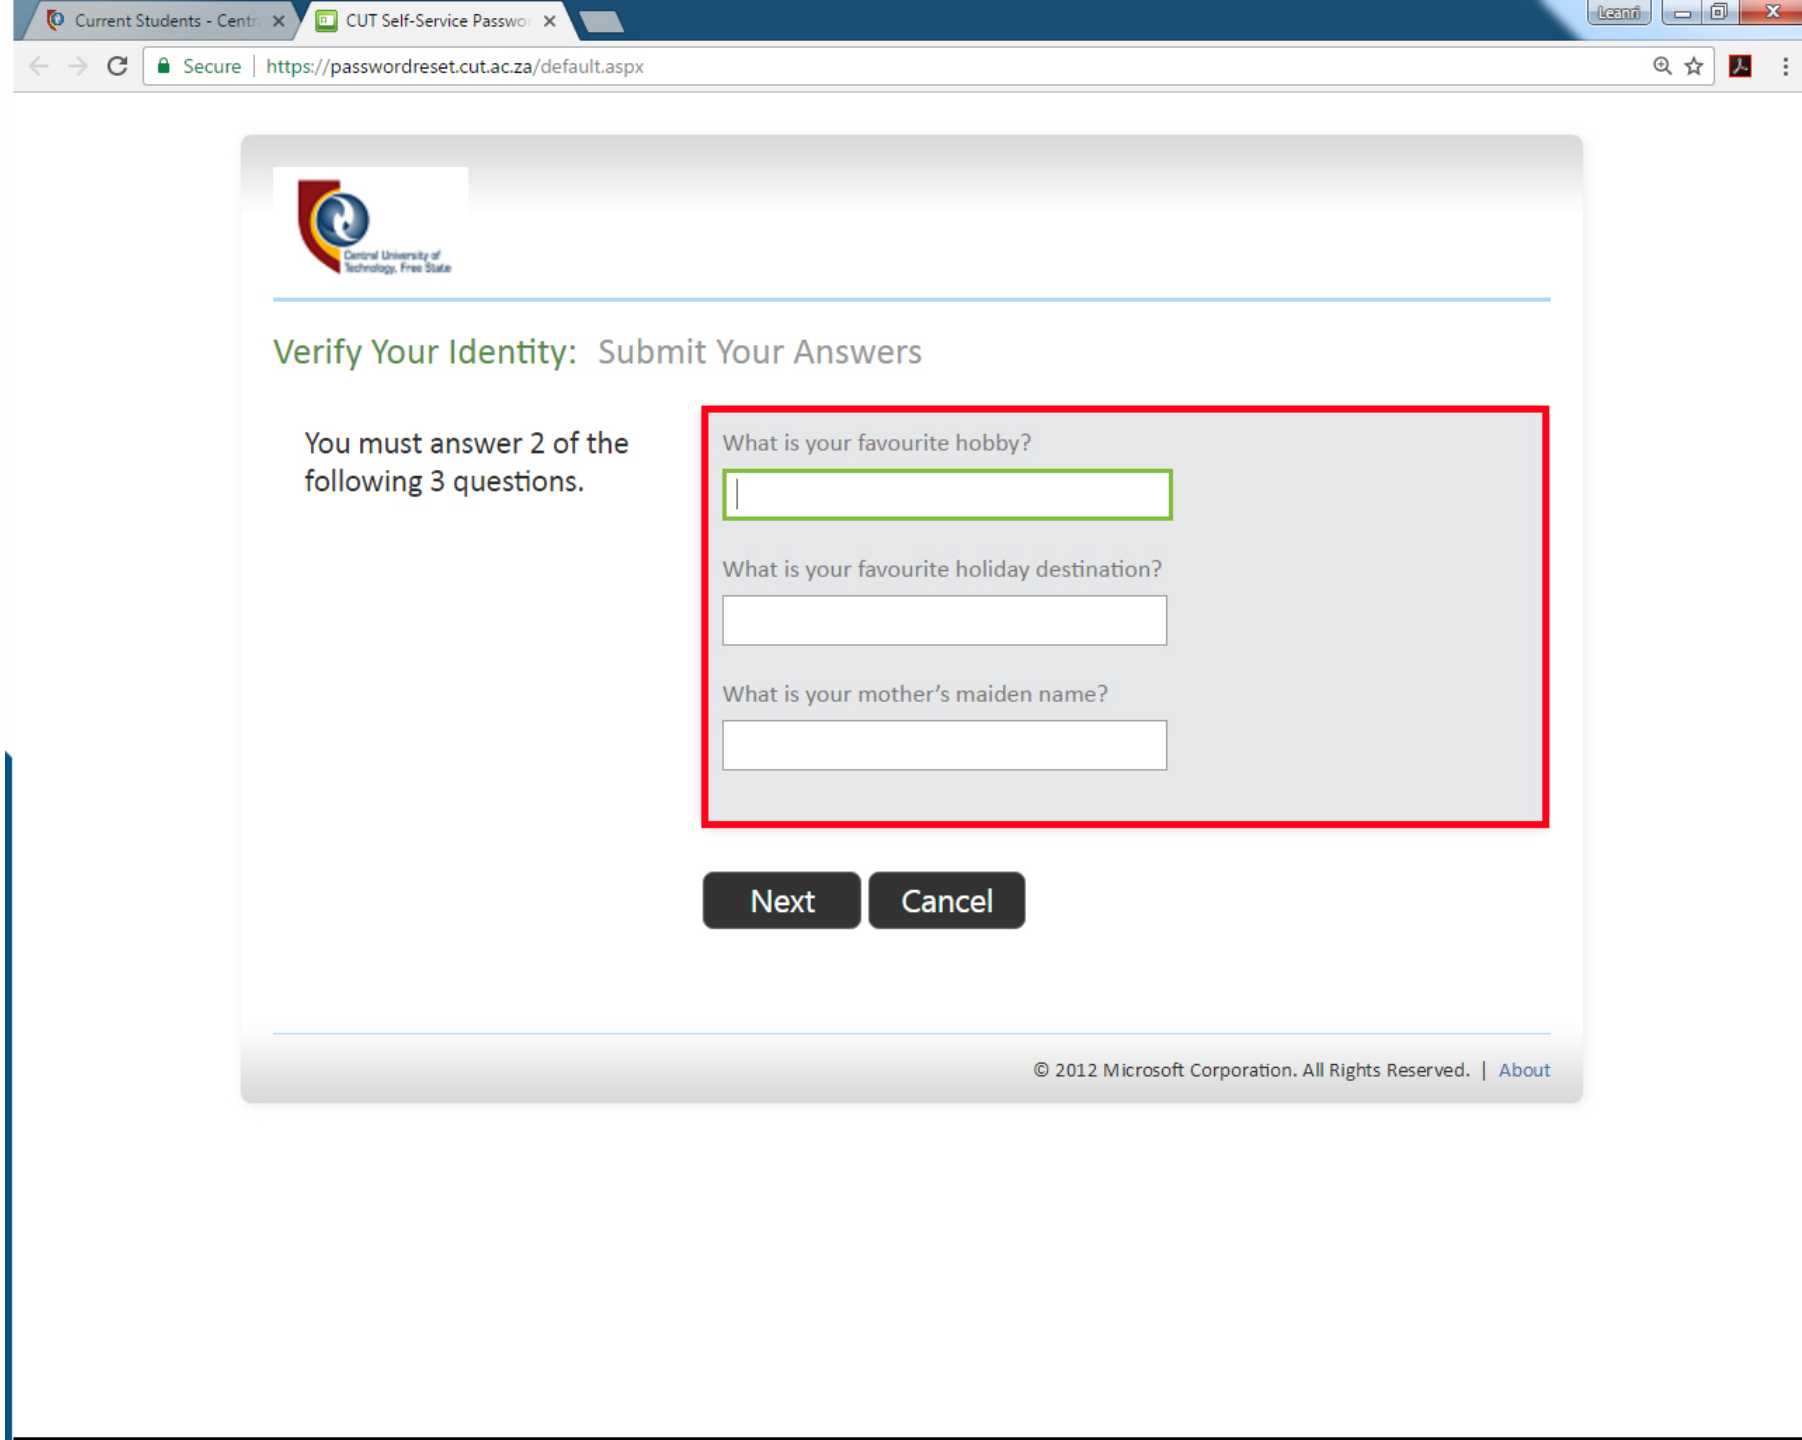
Step 4.

You will be redirected to a new window. Enter your user name in the box and click Next



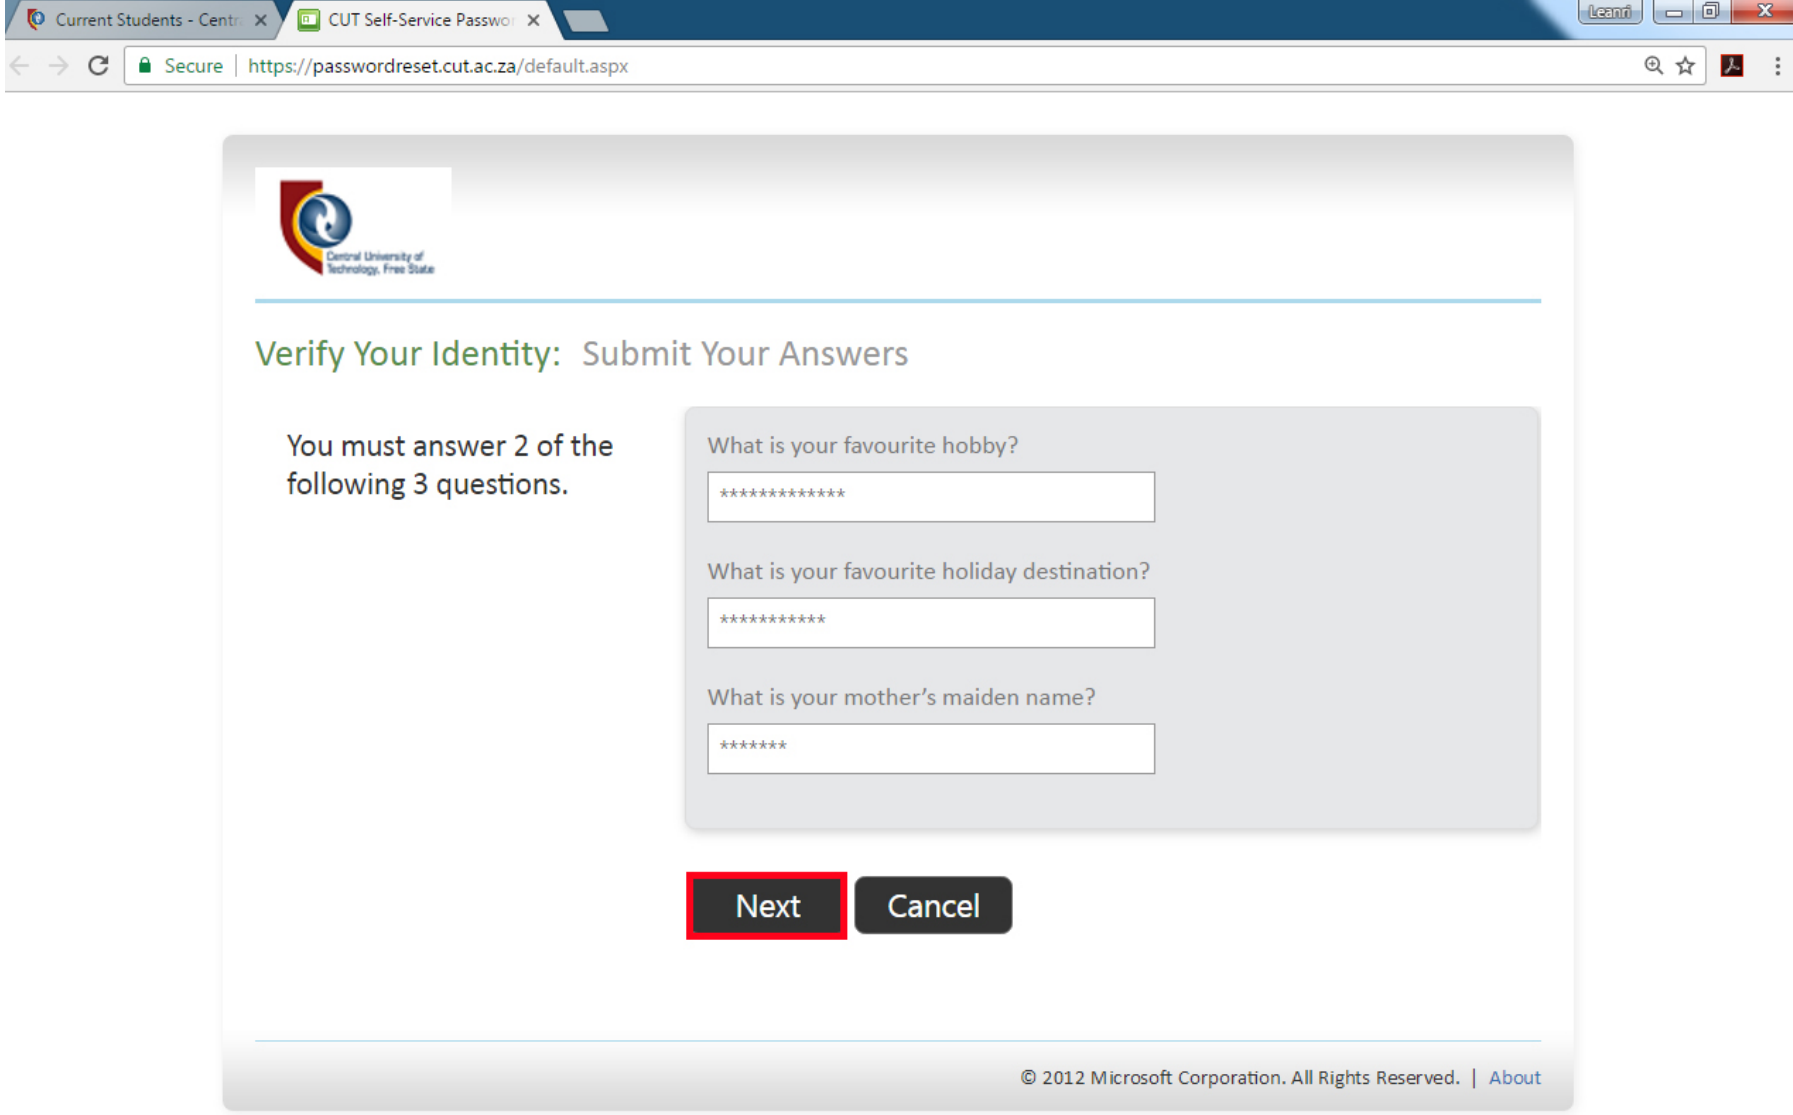
Step 5.

Answer the three questions to verify your identity (these are the answers you provided during the password registration process)



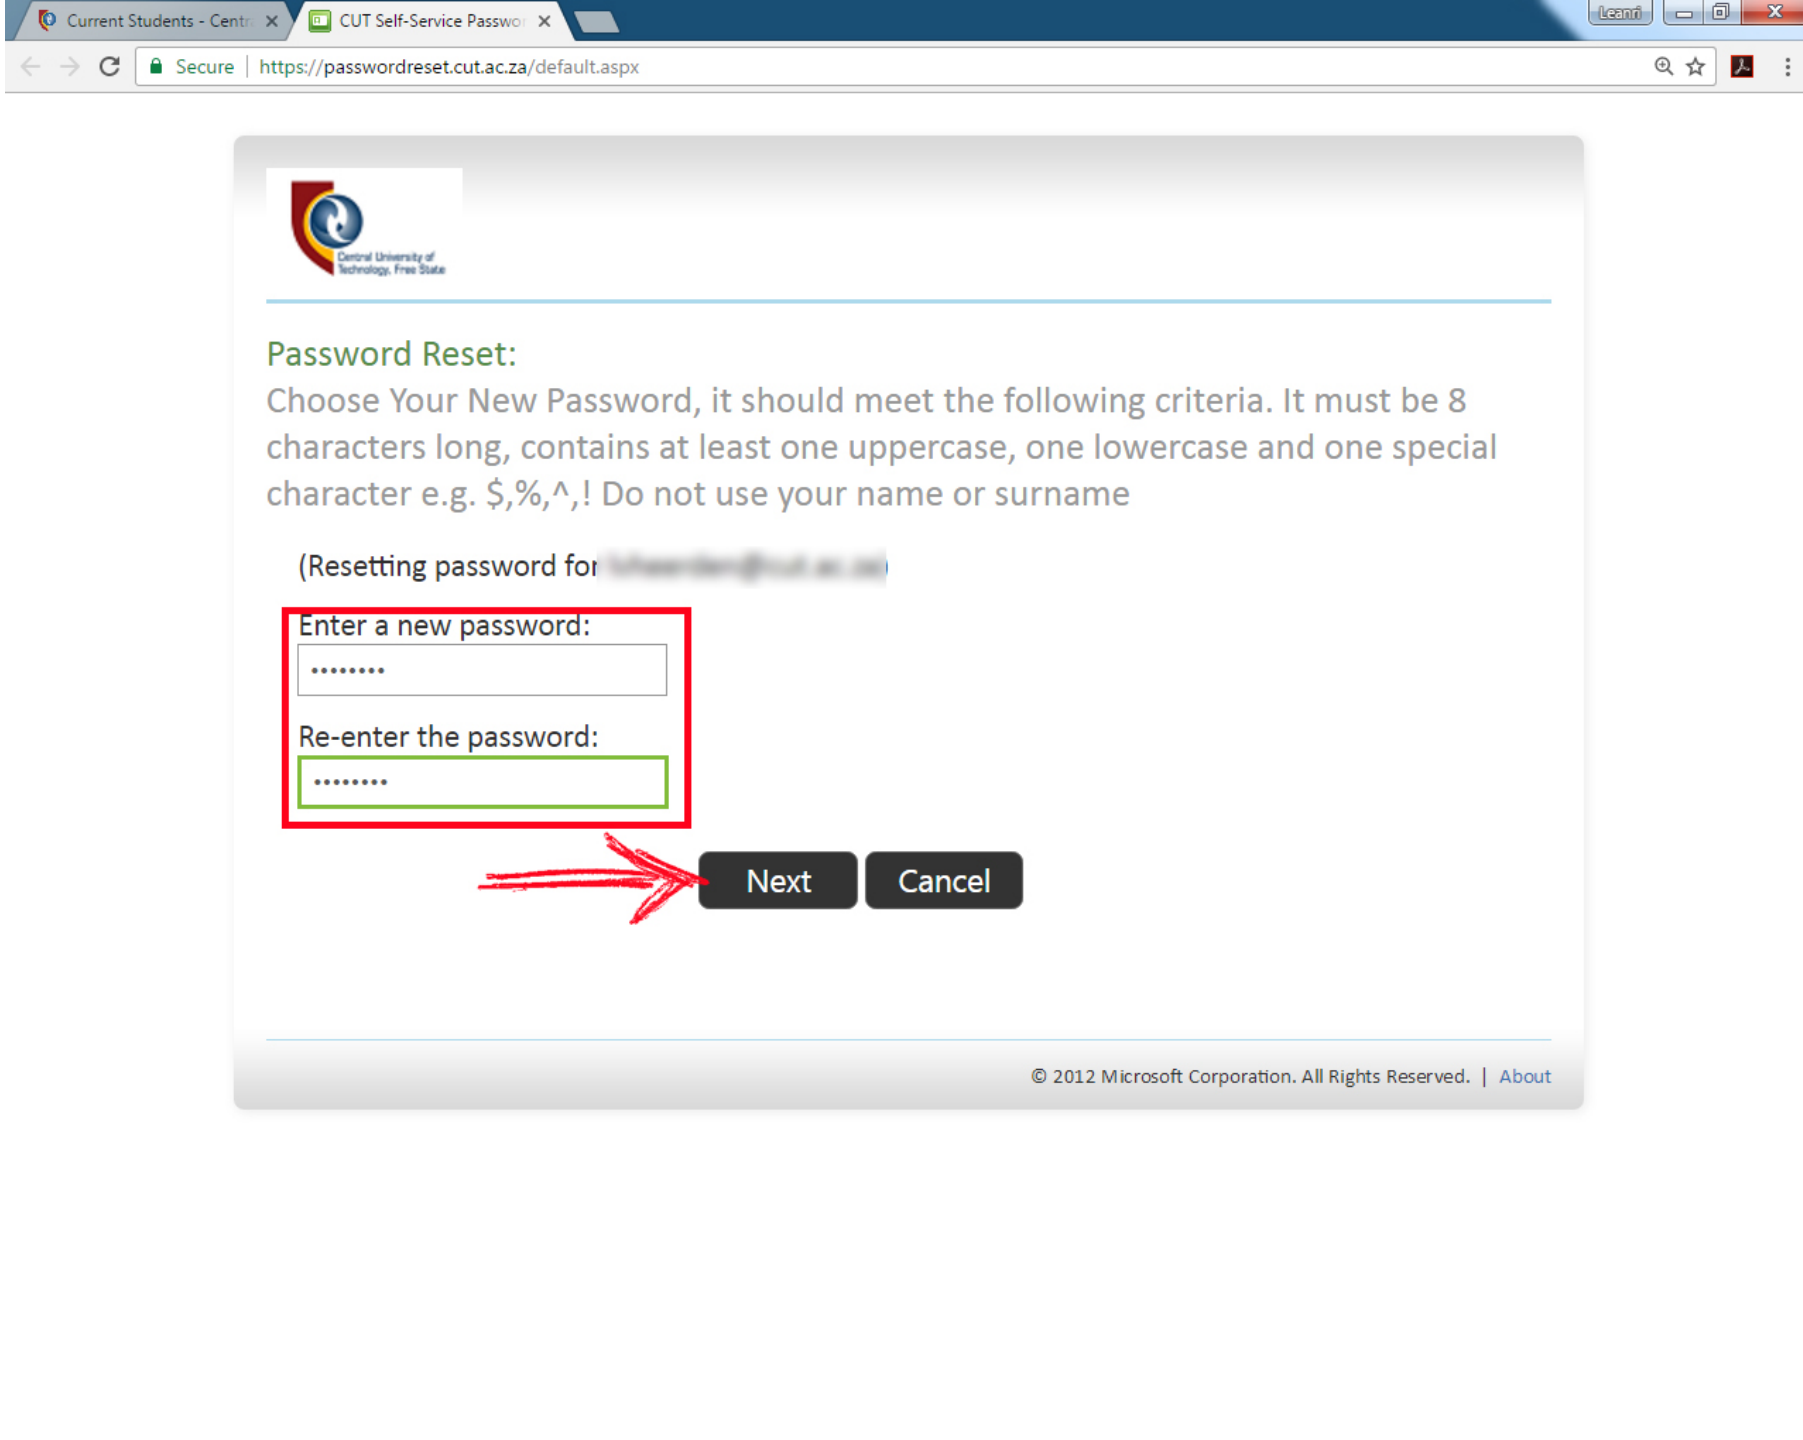
Step 6.

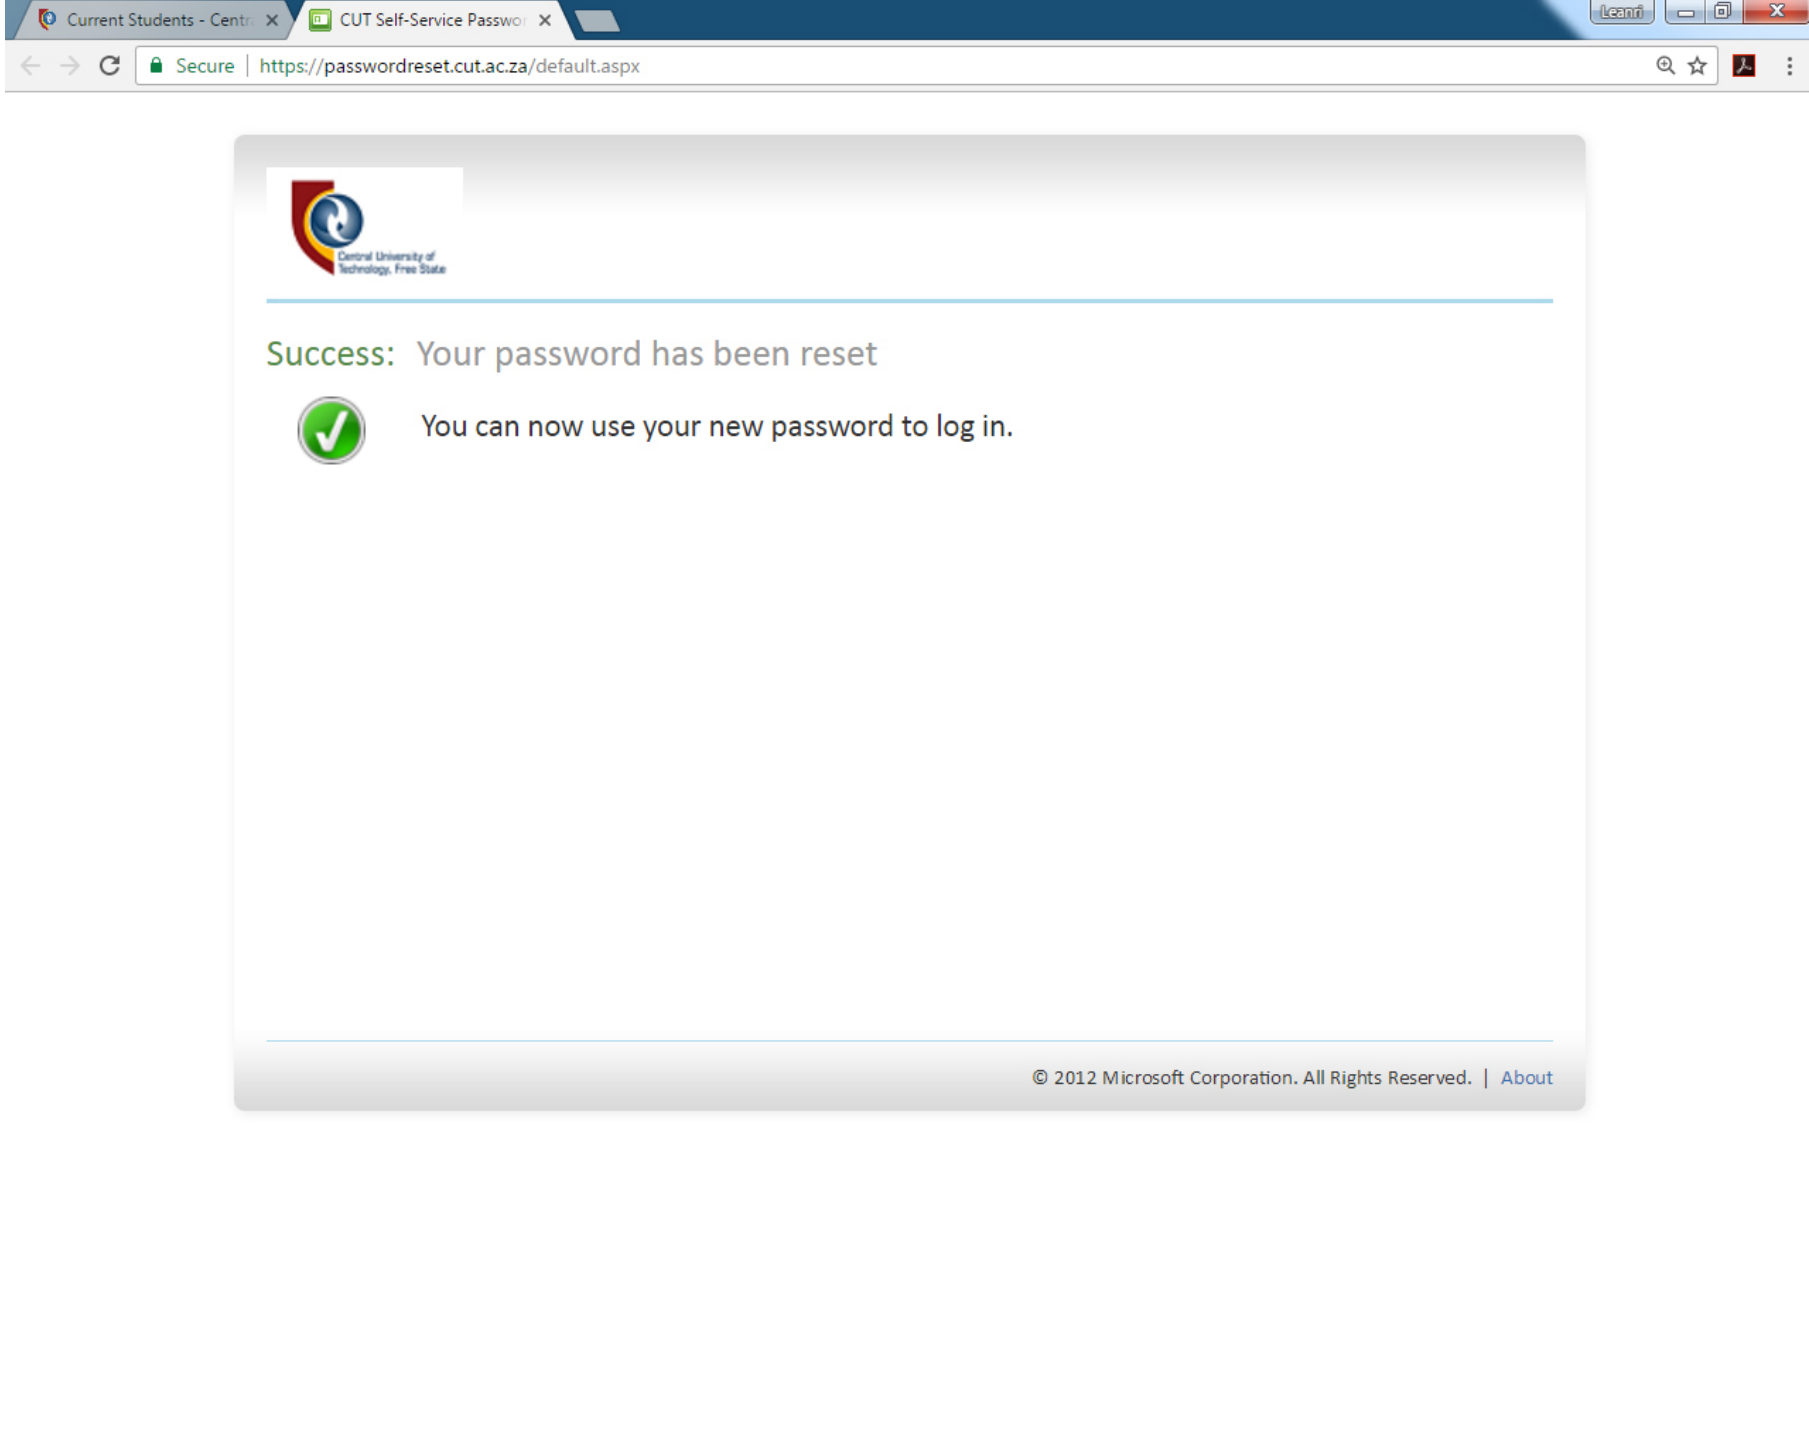
After you have typed in the answers to your security questions, click Next



Step 7.

You can now reset your password by entering and re-entering a new password in the box provided. Then click Next



All done.


Your password has been successfully reset and you can now log in with the new password. You will have to perform this action again in a month's time when prompted.
